CANADA MUST TAKE PART IN SOLVING PACIFIC PROBLEMS

Dominion Vitality Concerned With Clash of Forces in Orient; Sir Arthur Currie Declares at Canadian Club Luncheon To-day; Former Citizen Given Rousing Welcome on Return From Honolulu Conference

Canada can take and must take a leading part in solving the problems of the Pacific, where the clash of rival races and conflicting civilizations threatened dire consequences to the world, General Sir Arthur Currie told the Canadian and Kiwanis Clubs to-day, following his return to Canada as head of the Canadian delegation to the Institute of Pacific Relations at Honolulu.

Displaying a broad grasp of international affairs, Sir Arthur gave his audience in the Empress Hotel ballroom, a graphic picture of the forces which are in conflict in the countries fringing the Pacific. The Institute of Pacific Relations, he said, was attempting through the collection and dissemination of accurate information, to harmonize these rivalries, and preserve the peace of the world. In the Institute and in the whole international situation as it affected the Pacific, Canada had a big factor, he warned. Canadians, he emphasized, must think beyond their boundaries and seek to extend into a wider arena that unique success which they had achieved in their political institutions at home.

Sir Arthur was welcomed back to Victoria with unrestrained enthusiasm. The Empress Hotel ballroom was crowded to the doors with an audience which rose to its feet as one man to cheer the Principal of McGill University, the former commander of the Canadian Corps in France, and the old-time citizen of Victoria.

Kenneth Ferguson, president of the Canadian Club, presided, and with him at the head table were Lieutenant-Governor R. B. Bruce, introducing Sir Arthur, Mr. Ferguson, and a number of school teachers, and a number of other guests.

Not only in war but in peace also, Sir Arthur had made his mark, Mr. Ferguson declared, pointing to the success of his leadership at McGill.

WARMLY APPRAISED
A new outburst of applause greeted Sir Arthur when he rose to speak. Let me at once express my deep sense of personal gratitude for the privilege you have given me of more speaking to the Canadian Club or Victoria," said Sir Arthur in opening. "I have not forgotten nor can I ever forget your more than kind reception when I had the honor to address you."

One never returns to Victoria without feeling that one has been home again, and to a very beautiful home at that. The more one sees of other places the more one realizes how favored are those who have the good fortune to live here, and that remark applies to our country, Canada, as well. Each succeeding year makes more impressive the fact that Canada has a great heritage, that this land has been wonderfully blessed and that a proud destiny is ours. If we but do our duty as patriotic citizens and appreciate our full responsibility.

LAND OF EXQUISITE BEAUTY
I have just come from spending a month in Honolulu in the Hawaiian Islands—a land of exquisite beauty, of romantic charm, of tropical splendour and of transcendent interest in its people and their history; yet, without any disparagement of Honolulu, I much prefer Victoria.

Landing in Honolulu is an experience none can forget. As your ship slowly comes to dock you hear a band playing, for a band plays every ship in. You do not think that this is done by the shipping interests because it sounds so friendly and welcoming. You learn that this reflects the ancient spirit of Hawaii in which hospitality was a virtue and the word friend was sacred. A chorus sings what first seems a hymn. It is the Hawaiian song of welcome—"Alohae" meaning if it is meant—the melody blending with the tender feelings in your own heart. As you go ashore garlands of flowers called lei are hung round your neck and at once with smiling faces and warm hearts all around you, you are made to feel at home.

The people of Honolulu think it the most beautiful city in the world. Certainly it is very beautiful. Tropical flowers everywhere—hibiscus in shrubs and hedges and trees with millions of brilliant blossoms, the croton plants their foliage brighter than flowers. Stately royal palms and graceful coconut, feathery tree ferns, climbing Bougainvillea and greatest sight of all, hedges of more than half a mile long of night blooming cereus. It was blooming when we were there and one night I saw twenty thousand blossoms. (Concluded on page 3)

DEBTORS SUE FOR \$2,000 DAMAGES

Seattle, Aug. 23.—At last the worm has turned. Damages of \$2,000 for entering "into a conspiracy to harass, worry and annoy them" in an effort to collect a \$75 grocery bill are asked in a suit filed in superior court here to-day by Wallace W. Rock, a cement worker, and his wife, debtors. The annoying creditor and his co-defendants, when Rock alleges are responsible for seven successive lawsuits against him, are Al Abrachin, the grocer; L. M. Koenigsberg, a collection agency, and S. Co. described as Koenigsberg's "handy man."

HUNDREDS OF EX-OFFICERS LOOK TO B.C.

Only Province Included in Present Plan of Overseas League

Sir Henry Cowan, M.P., Says First Party Will Arrive in Spring

British Columbia has been selected as the prospective home for hundreds of ex-officers of the British army, navy and air force, who are anxious to take up farming in Canada, said Sir Henry Cowan, M.P., who with Lady Cowan and Miss Jean Cowan are visitors at the Empress Hotel on their way to Australia and New Zealand.

Numerous applications have already been received by the Overseas League, and selection has been made of a number of desirable prospective settlers who will be sent to Canada as soon as arrangements can be made. They are men with small incomes, moderate capital and most of them have service pensions. The first will arrive early in the spring, and Sir Henry anticipates that hundreds will follow.

FRUIT FARMING
They cannot be sent, he said, "until satisfactory arrangements can be made to receive them. We want to establish sub-committees throughout the Province of persons who are prepared to receive the settlers on arrival, and to them some preliminary hospitality and advice from local conditions with the ultimate objective of purchasing land and protecting against any persons who might exploit their inexperience by inducing them to purchase unsuitable land at an excessive price. Most of the men are interested in fruit farming."

Sir Henry conferred with persons interested in Toronto and Vancouver, and this morning met Victoria persons with the object of forming a sub-committee in this city. For twenty-one of the last twenty-two years Sir Henry has been a member of the British House of Commons representing the Northeastern Division of London, and his trip is largely to renew acquaintance with the dominions, and to see the progress of the settlement in Empire migration and settlement and a member of the Council of the Overseas League. In Australia and New Zealand he will represent the same interests, although the migration scheme at present does not extend beyond British Columbia. He is interested generally in settlement plans, and was vice-chairman for many years of the Empire development committee of the House of Commons for the last twenty years. He is now merged in an official committee representative of members of the Conservative party especially in these questions.

ON A MISSION
Sir Henry is also one of the oldest members of the Empire Parliamentary Association and the official organizer of branches in all parts of the Empire. He is entrusted with a mission on behalf of the United Kingdom branch in Australia and New Zealand, and particularly will endeavor to form a branch at present.

He has large commercial and industrial interests in the Antipodes, and will take the opportunity of establishing personal contact with them. Sir Henry paid a tribute to the work of P. A. Pauline, British Columbia agent in London as a member of the Overseas League.

Russian Oil Man Is Ordered Out of Great Britain

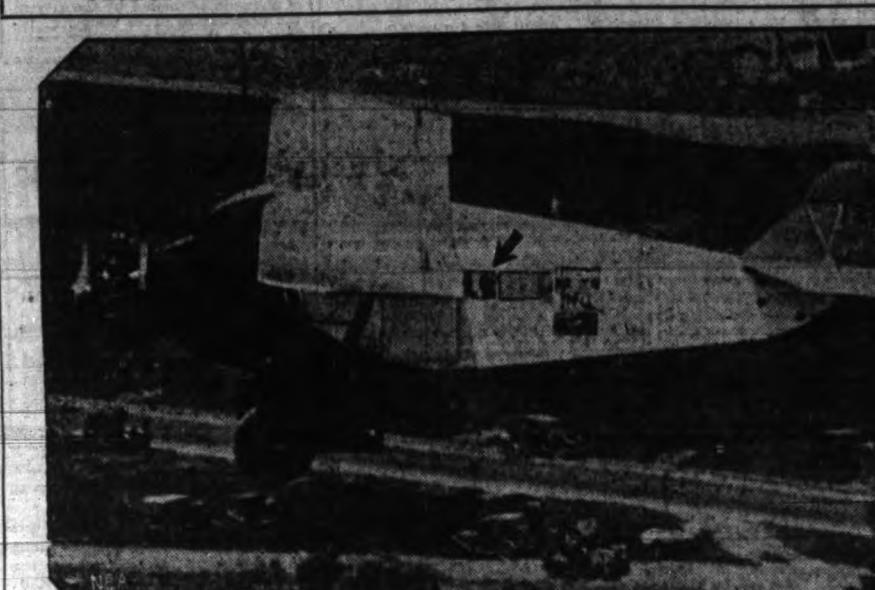

London, Aug. 23.—The London Daily Herald, Labor organ, says one of the chief directing authorities of the "Russian oil products" has been ordered to leave Great Britain. "The action of the Home Office has created great surprise," says The Herald, "as the official concerned has been here in purely commercial work."

MINING EXPERTS VISIT OTTAWA

Montreal, Aug. 23.—This morning the Empire Mining and Metallurgical Congress entered the second and last day of its Montreal meeting. Following to-day's functions, which include a luncheon and a dinner, the congress will go to Ottawa.

The mining delegates are to visit Victoria during their western tour.

OBJECT OF PACIFIC SEARCH; AEROPLANE MISS DORAN

The above picture of the Miss Doran was taken as it was leaving Oakland, Cal., August 16 for Honolulu. The arrow points to Miss Mildred Doran, twenty-two-year-old school teacher of Flint, Mich., at the window. She was a passenger with J. A. Pedlar as pilot and Lieut. V. R. Knope as navigator. The lower picture shows the She was a passenger with J. A. Pedlar as pilot and Lieut. V. R. Knope as navigator.

MANY WERE HURT BY TWO EXPLOSIONS

Fourteen Taken to Hospitals After Accident at Manchester, England, To-day

Whole Fire Department of City Called Out to Fight Outbreak

Manchester, Eng., Aug. 23.—Fourteen persons were taken to hospitals here and many others suffered minor injuries to-day in the explosion of two gas tanks at the Bradford Road Gas Works.

The complete fire department turned out to fight the fire which resulted, and police cleared out houses and hotels in the neighborhood for fear other gas tanks, one of which is said to be the largest in the world, would be endangered.

ROYAL CITY VOTERS ARE ADDRESSED BY PREMIER MACLEAN

Gray, Liberal Candidate, Also Speaks at Meeting; Voting Next Thursday

New Westminster, Aug. 23.—With polling in the Provincial by-election set for next Thursday, the campaigns of the two parties to-day are in the home stretch. There have been indications observable every day as the campaign progressed of the growing strength of Mayor A. Wells Gray, Liberal candidate.

A well-attended meeting in St. Barnabas Hall last night in the interests of Mayor Gray was addressed by Premier MacLean, Hon. W. H. Sutherland, Minister of Public Works and the candidate, all of whom were given a rousing reception.

PROGRESSIVE POLICIES
Premier MacLean said the Government he headed intended to remain in office and continue the progressive work being carried on by the late Government when death, robbed the Province of the leadership of Hon. John Oliver. The Cabinet had no intention of resigning.

"We will not consider the dictates of our opponents," said the Premier. "In the past we have won decisive victories and we will remain so long as it is in the best interests of British Columbia. We will stand by our record. The issue can only be forced by public opinion and I think the Province can ill-afford to spend a quarter of a million dollars on the costs of an unnecessary election."

DEVELOPMENT FORESEEN

A comprehensive scheme of progressive development for New Westminster for which Government support has been pledged was outlined by the candidate.

He criticized Hon. H. H. Stevens, who was supporting the Conservative candidate in this by-election. "Mr. Stevens is no friend of New Westminster," Mayor Gray said. "At a Winnipeg conference some years ago when the question of elevators at the coast came up he could not say anything good about the Fraser River."

FRASER BRIDGE

Switching to local problems, Mayor Gray declared emphatically that he was opposed to a bridge at Ladner. In regard to the Fraser River Bridge question, Premier MacLean said the Government could not be held responsible for the passage of the bill, as it was of a private nature. It had 8-cent and the 25-cent pieces. Under

FALL EXHIBITION AT WILLOWS PARK FORMALLY OPENED

Alderman H. O. Litchfield Declares Fair Open to Public; Over 3,000 Adults and Thousands of Children at Fair Yesterday

The formal opening of the Willows Exhibition took place this afternoon at 2 o'clock in the Main Building. Alderman H. O. Litchfield presiding.

Reeve Herbert Anscombe spoke on behalf of Oak Bay. The attendance yesterday broke all records for first-day takings at the exhibition, there being 3,015 persons paying at the gates, in addition to the thousands of children who were admitted free of charge. The record is the more notable when compared with the paid admissions of the first day in 1926, the previous record, when 1,623 patrons were recorded.

Judging of livestock commenced this morning, with an unusually large number of exhibitors. Short-horns were classified by J. W. Durpo of Calgary. Angus L. Hay of Kamloops awarded the ribbons in the Ayrshire section, and Hugh Nibbet had before him the largest competitive entry of Holsteins he has seen this year. Mr. Nibbet has been judging this season at many Western exhibitions and, when the two-year-old cows were brought forward, he remarked: "This is the most competitive and largest entry in this class I have seen anywhere."

This afternoon the Aberdeen Angus and Hereford beef cattle classes will be judged, together with the breeding classes of Clydesdale heavy horses.

REMARKABLE TEAMS
There is much interest this year in the team competitions for heavy horses, three six-horse teams being entered. The Fraser Valley Milk Producers' Association is showing a team of six Clydesdale geldings, Burge and Ruby of Albany, Wash., show a wonderful team of six Percheron mares and E. C. McCoskey of Garfield, Wash., will show six Clydesdale mares. Nothing comparable with this demonstration has been seen here before.

FISHING PRIVILEGE MAY BE STOPPED

Run of Pink Salmon in British Columbia Waters at Present Small

Vancouver, Aug. 23.—Gill net fishing for pink salmon in all British Columbia waters north of Howe Sound may be stopped by the Federal authorities at the end of this week.

"Closure is a very serious step to take," declared Major Motherwell, "but it may be necessary. There are very few pinks running and we are anxious to save the few that should have an opportunity to spawn."

The run of pinks, it is reported, has been so small this season that fears are expressed the future of the industry is threatened.

THREE SENTENCED TO DEATH
Moscow, Aug. 23.—The supreme court has sentenced to death three officials of the Caucasian co-operative organization, who were charged with fraud and embezzlement. Six others were given prison terms of one to ten years.

CONFEDERATION COINS SOON TO BE PUT IN CIRCULATION

Ottawa, Aug. 23.—Gustave Hahn and J. E. Macdonald of Toronto were the successful contestants in the Dominion-wide contest for designs for the proposed new coins to mark the Diamond Jubilee of Confederation. It was announced here to-day.

Mr. Hahn submitted the design chosen for the one-cent bronze piece, and Mr. Macdonald the designs for the 5-cent and the 25-cent pieces. Under

VANZETTI THROGS DISPERSED BY POLICE IN SEVERAL CITIES

Most Serious Rioting Caused By Executions Is Seen in Geneva

Hose Played on Crowd of 2,000 by Firemen in That City

Geneva, Aug. 23.—About 2,000 manifestants assembled before the United States consulate here early this morning in protest against the execution of Nicola Sacco and Bartolomeo Vanzetti in Massachusetts. Firemen were called out and drenched the mob with water.

New York, Aug. 23.—Demonstrations in behalf of Nicola Sacco and Bartolomeo were staged before and after their execution in various European and South American cities.

Communists in Berlin and other German cities attempted to stage demonstrations, but they were promptly suppressed by the police.

POLICE CHARGED CROWD
Some disturbances took place at Stockholm and Gothenburg, Sweden. At the latter place police had to charge a crowd when it tried to reach the United States consulate. The police of Stockholm were busy until past midnight dispersing demonstrators. Monday there were demonstrations at both places, attended by many thousands of persons. Resolutions were drawn up for presentation to the United States Legation asking remission of the death sentences against Sacco and Vanzetti.

RAINED IN PARIS
Paris had several demonstrations, but a steady rain kept them from being able to attract a large crowd. The Communist Party went to the United States Embassy in an effort to plead with Sheldon Whitehouse, Charge d'Affaires. He consented to receive some of them and they presented a resolution urging a final appeal for pardon be sent to Washington.

DAMAGE IN GENEVA
At Geneva the demonstration took a serious turn. The manifestants, after marching on the United States consulate and being beaten off by police, broke windows in the great Hall of the League of Nations Palace.

From the Palace the crowds went to the United States agency of two picture theatres showing American films and began to attack it. Streams of water had to be played on the demonstrators before they could be dispersed. In the course of the struggle with the police someone fired a shot, killing a bystander.

5,000 IN CROWD
The Geneva correspondent of the Exchange Telegraph Company, London, in his report from Geneva, said that the crowds were estimated at 5,000 persons. The demonstrators were seen in the streets and badly damaging United States shops. He described raids on motion picture theatres where United States films were being shown. Signs of Douglas Fairbanks, Mary Pickford and Norma Talmadge being destroyed in the streets and twenty-five persons injured.

WORKERS IDLE
There was a fairly complete stoppage of work throughout Argentina Monday as a mark of sympathy with the condemned man. In Buenos Ayres a (Concluded on page 4)

Courtney and Crew Postpone Flight

Southampton, Eng., Aug. 23.—Capt. F. T. Courtney and his two companions, after preparing to start this evening for the Azores, on the way to New York, in their Dornier-Diplomat flying boat, The Whale, at the last moment postponed the flight until to-morrow.

BOY LOST LIFE

Vancouver, Aug. 23.—W. A. Eison, aged fourteen, of Templeton Drive, collapsed in shallow water before the eyes of his mother and two young sisters, and was taken out by a lifeguard. An autopsy will be held.

BOMB SET OFF IN STREET OF CANTON

Number Arrested For Sharing in Demonstration Before Bank in Chinese City

Canton, China, Aug. 23 (Delayed).—A bomb was exploded at the main offices of the Government Bank here to-day immediately after a number of persons had been arrested for taking part in a hostile demonstration in front of the bank. Although the authorities denied there were casualties, the general belief is that several persons were killed when the bomb exploded.

A hostile demonstration against the bank caused the authorities to surround the property with a heavy guard. Policemen searched all those who entered the building.

Previous advice from Canton said rumors of the imminent failure of the official depository and of the discounting of Nationalist notes by twenty per cent had caused a large number to withdraw their accounts. It was stated a prominent member of the Chamber of Commerce had been arrested on the charge of spreading rumors.

NEW LIQUOR PROFIT CUT BRINGS GRANTS TO B.C. CITIES TO HUGE FIGURE

With Allocation of \$534,506 to Municipalities To-day Government Aid Totals \$28,942,731 for Ten Years; Municipalities' Position Revolutionized Since Dark Post-war Days, New Figures Show; Profits From Liquor Stores Increase

PRINCES SAY FAREWELL TO CAPITAL CITY

At 3 o'clock in the Morning Citizens Cheer Royal Party at Dock

This morning at the early hour of 3 o'clock the Prince of Wales, Prince George and the other members of the royal party said farewell to Victoria and embarked for Vancouver on the Princess Alice, which was held back from the usual midnight sailing. Even at that early hour their Royal Highnesses did not leave the city without a good send-off.

A LAST CHEER
Many of the guests who had attended the reception and ball at Government House drove to the wharf, some returning to Vancouver on the same boat. Many of the Victoria people who were at the function said farewell to the Prince of Wales, who was accompanied by the Princess Alice, which was held back from the usual midnight sailing. Even at that early hour their Royal Highnesses did not leave the city without a good send-off.

MAKES BIG TOTAL
The present is the twelfth distribution of the statutory portion of liquor profits set aside each half year to aid the various municipalities to defray the cost of education within their boundaries.

Including the present grant the total proportion of liquor profits to municipalities for educational purposes has reached a new high mark of \$5,419,257. From liquor profits, motor-vehicle revenue, and pari-mutuel taxes the Province has turned over to the municipalities \$11,599,237 since 1921.

In 1926, before the present policy of the statutory portion of liquor profits set aside each half year to aid the various municipalities to defray the cost of education within their boundaries.

CANADIAN WHEAT POOL SYSTEM IS FAVORED IN STATES

Chicago, Aug. 23.—The proposal of Samuel McKelvie, former Governor of Nebraska, that the Canadian wheat pool system be adopted in the United States was given the qualified approval of Illinois farm leaders here yesterday.

At 65 Leisure for play and the means to pay.

HE has nothing to worry him these days, so he can concentrate on his game.

In some way or other he has regained a measure of his youth. He has learned to play again.

He beams prosperously on the world at large and men like to shake him by the hand.

He hasn't lived like a miser during his younger days, either, in order to reach this pleasant condition.

Who is this fortunate man?

His name is—Many Hundreds—for there are many hundreds of him on our books, scattered throughout Canada, enjoying the fruits of the retirement income policies taken out in this Company.

Will you at 65 have leisure for play and the means to pay?

It can be done with probably less financial effort than you think. It should be done NOW while you are insurable. The coupon below offers an easy "find out" method.

NEW ORDERS FORBID CHILDREN TO GATHER

Waves of Infantile Paralysis in Trail and Rossland Are Fought

Rossland, B.C., Aug. 23.—Rossland City Council, with two cases of infantile paralysis reported, has forbidden assembly of children under the age of fifteen, on the recommendation of its medical health officer. This follows voluntary action of Trail institutions and organizations to the same effect, Trail having up to the date had thirteen cases of infantile paralysis, two of which ended fatally.

Trail, in addition, had eight typhoid cases in July and has just had three children die of typhoid after very brief illnesses.

THREE DEATHS
Trail, B.C., Aug. 23.—Deaths of children from typhoid fever in the epidemic here were brought to three last night when an eighteen-months-old baby died.

CANADA MUST TAKE PART IN SOLVING PACIFIC PROBLEMS

(Continued from page 1)

each bloom impeding in size, delicate as a fairy in its beauty and gorgeous and sumptuous in its richness.

LIQUID-SUNSHINE
"People who had not been there told me I would see greatly from the hot climate, but such was not the case. I remember no discomfort, the warm sun being tempered by the constant never-falling cooling trade winds. There were many showers, too, but I must not call them showers, for by the Hawaiians they are known as liquid sunshine. You stand in the tropical sun, and still feel cool, and the sun still shining. You look around to solve this puzzle of cloudless rain and lo, it has ceased raining on your side of the street, but still pouring on the other. Within a few minutes' drive from the Royal Hawaiian Hotel where I stayed there were two climates, one where it rained every day and some where it scarcely rains at all. Upon Mount Tantalus—half an hour from Honolulu—it rains six times as much as in the city while across the valley the black tree trunks of Diamond Head are never wet."

"Magnificently beautiful as the tropical vegetation is, congenial though the climate may be to the people of the Islands which interested me most, Honolulu is called the crossroads of the Pacific. It is East of the East and West of the West. In the past, ships have brought, as to a laboratory, samples of all the peoples and all the problems of mankind. Here are being tried out on a small scale some of the puzzles in whose solution may depend the future peace of the world. In those small islands you will see Anglo-Saxons, Portuguese, Polynesians, Filipinos, Japanese, Chinese, Hawaiians and a mixture of all these. Two of the descendants of the old missionaries and the first traders intermarried with the native Hawaiians. The head of the former royal house, Princess Abbie, is the daughter of a Scotch merchant, Campbell, who married an Hawaiian woman. The present number of all the others although all further immigration from Japan has been forbidden. There has been much intermarriage between the nations of the Pacific. The institutions, social, political and educational are Occidental and the people mostly Oriental. Can these institutions stand the test?

HIS MISSION
"Perhaps I have said enough to you about Honolulu, because I wished to speak to you particularly about the Institute of Pacific Relations at which I had the honor to be one of Canada's members. And yet it seemed appropriate to say something of Honolulu, because it is not for that small community the Institute might never have seen the light of day. The people of Honolulu at the crossroads of the Pacific are brought into intimate touch in a business way with every shore of that great ocean. Anyone who has thought at all of world affairs must have come to feel in the last few years that Europe was not the only or perhaps the main centre in which another storm might arise to involve the world at large. In recent years it has become apparent that round the shores of the Pacific were development conditions, which, unless studied and appreciated, understood and interpreted rightly, might lead in time to a catastrophe which might not be limited to the Eastern hemisphere. These conditions have been noticed and viewed with concern by many, but it remained with some people in Honolulu to take the initiative and see if something could not be done to bring about a better understanding between the nations of the Pacific. They decided to invite persons like themselves from various Pacific countries to meet them and discuss what private citizens could do to deal with the causes which left to themselves might disturb the peace of this ocean. In July, 1925, there went to Honolulu, in response to that invitation, parties from Australia, Canada, China, Japan, Korea, New Zealand, the Philippines and the United States. At that first conference there were none from Great Britain, a fact which caused some embarrassment to the representatives from Australia, Canada and New Zealand. The idea seems to have prevailed that, at the first conference, the problems of Oriental immigration would form the chief topic of discussion. As a matter of fact, the condition of China quickly thrust itself into the forefront. Members from the British dominions found themselves unable to explain the history and motives of British policy in China. So when it was proposed to hold another conference this year, they asked that there be invited from Great Britain such persons as could bring to the conference a complete knowledge of all the relations—past and present—between Great Britain and China.

BRITISH DELEGATION
As a result of an invitation to participate, Great Britain sent a very strong delegation, led by Sir Frederick W. White, formerly president of the National Indian Legislative Assembly. The group also numbered Mr. Lionel Curtis, honorary secretary of the Royal Institute for International Affairs, London; Professor Webster Woodrow Wilson, professor of International Politics, University of Wales; Professor Hinton of University of Hongkong; Dr. Hodgkin, secretary of the National Christian Council of Shanghai. These and others contributed greatly to the discussion. All the countries represented in the conference of 1925 were more fully represented

last month. Australia by five, China by fourteen, Great Britain, also fourteen, Hawaii by fifteen, Japan by eighteen, Korea by three, New Zealand by five, Philippines by thirteen, United States by forty-four. Canada by sixteen, while there were three observers from the League of Nations staff at Geneva, in all a conference of 140 men and women representing all the races, creeds and colors, the political, social, educational and religious institutions of the people who live in countries whose shores are washed by the Pacific, except Russia, Mexico and the South American States. Russia and Mexico were asked to send representatives, but none appeared.

IMPRESSIVE EXPERIENCE

To me, gentlemen, it was a most impressive experience to sit in such a conference. The delegates met on an absolutely equal basis and discussed the problems of the Pacific in a frank, unreserved and constructive and fraternal spirit. They did not represent their own government, or any political, social or religious organization, nor did they have any axe to grind. They met as Dr. David Tui, the leader of the Chinese group, put it, "to exchange our ideas and experiences, to face the facts in any given problem and to understand them, to dream dreams together for a better world in which we shall truly live and let live, and through mutual understanding and co-operation to evolve a plan of peace whereby our dreams will be fully realized and Pacific relations will be placed on a solidly Pacific basis."

We discussed many questions and problems together, probably too many in the two weeks at our disposal. Let me give you some of the topics.

China—Oriental immigration and migration, population and development, international education, diplomatic relations in the Pacific, the future of the Pacific, and with particular reference to China tariff and extra-territoriality and concessions and foreign settlements. We spent three full days on this topic, and it was by no means exhausted. By common consent it was placed first, and you can well understand the reason for so doing. I think everyone who attended the conference could not help but view with grave anxiety the present disorganization of China. Do you realize that in that closely populated territory, second in size only to that of all our great nations, there are conditions comparable only to those of Europe when the Roman empire collapsed. The political framework of China has broken down and one quarter of mankind is in chaos.

Broadly speaking, this state of paralysis has been caused by the impact of new ideas and methods of civilization character and dynamic in force—on a civilization rigid with age. The chaotic condition reacts on all the nations in touch with China, and apparently more of all our great nations, Britain and Japan, which last country may, in the future largely depend for its very existence on Chinese markets and Chinese raw materials. China's relations to some of the nations are determined by treaties difficult to alter without the consent of all parties, and yet the Chinese attitude in that the treaties must be altered at once and brought into harmony with the ideas of an aggressive Chinese nationalism. Attempts made by the Government to make such complete relations are growing menaces to the peace of the world which depends on an ever-increasing control of human society by itself. In the Far East such control is threatening to vanish.

You may say that such a state of affairs is clearly a matter for governments—that it is a political condition and can only be solved in a political way. But it is more than that, and the question arises whether individuals in their private capacity, apart from governments, have any responsibility for the peace of the world. Either they have or else they have not, and I believe they have. If they have they cannot begin to discharge it, unless they devise for themselves some instrument for collecting and disseminating information so conspicuously lacking without which no one can rightly judge what ought to be done. I know of no question of first importance in the world affairs in respect of which sufficient information is so conspicuously lacking. If better information is needed by the people interested in the peace of this hemisphere, their obvious course is to establish some common agency for collecting this information, and after its collection, to meet to discuss with each other what this information means. That is the reason why the Institute of Pacific Relations was formed. I do not say that the institute is yet such an instrument for the collection of facts and discussing them, but I believe it can be made so, and at the conference just closed important steps were taken leading to that end.

FACT FINDING BODY
It is an easy matter to criticize the institute. It is not by any means a perfect instrument, but I believe it can make a very notable contribution to the maintenance of peace on this Pacific Ocean area. Fundamentally it is a fact finding body, providing an opportunity for interested people to get access to facts and to think out their significance. The institute realizes that it is not an "official" diplomatic body, and that it must refrain from every form and appearance of propaganda, but the putting out of facts is not propaganda, and so the institute is fully sensible to the need of scrupulous care with regard to the scientific accuracy of publications issued under the authority of the institute.

The conference provides a clearing house for ideas and an opportunity for personal contacts. Who knows, but that through its discussions, its influence on public thought and possibly on governmental action, it may indicate a road which if followed may lead to a peaceful solution of problems now fraught with grave danger.

I would like to close my direct reference to the institute by making a plea to the business men of Canada to take an interest in it and in what it is trying to do. The last conference was preponderantly academic, with the result in my mind—and I speak for myself alone—that stern realities, political as well as commercial did not receive their adequate weight in the course of the discussions. I do not want my academic friends to think that I am in any degree belittling the contribution they are able to make in the understanding and appreciation of public affairs. Their influence can be and is great. They probably know how to influence public opinion better than business men, but the danger arises when their opinions are formed without continual contact with men of affairs. Professors had at least as much to do with creating the atmosphere which led to the Great War as the operations of business men. The remedy is that students and business men should do their thinking together and in my mind the future utility of the institute will depend upon how far it succeeds in achieving this object.

CANADA'S INFLUENCE
And now a word or two about Canada and I'm through. I believe that the influence and example of Canada will count for much in the settlement of Pacific problems.

Every nation and civilization exists for the purpose of making a distinctive contribution all its own to the whole of human history, and the nature of our contribution is determined by circumstances.

(Concluded on page 4)

affairs is clearly a matter for governments—that it is a political condition and can only be solved in a political way. But it is more than that, and the question arises whether individuals in their private capacity, apart from governments, have any responsibility for the peace of the world. Either they have or else they have not, and I believe they have. If they have they cannot begin to discharge it, unless they devise for themselves some instrument for collecting and disseminating information so conspicuously lacking without which no one can rightly judge what ought to be done. I know of no question of first importance in the world affairs in respect of which sufficient information is so conspicuously lacking. If better information is needed by the people interested in the peace of this hemisphere, their obvious course is to establish some common agency for collecting this information, and after its collection, to meet to discuss with each other what this information means. That is the reason why the Institute of Pacific Relations was formed. I do not say that the institute is yet such an instrument for the collection of facts and discussing them, but I believe it can be made so, and at the conference just closed important steps were taken leading to that end.

FACT FINDING BODY
It is an easy matter to criticize the institute. It is not by any means a perfect instrument, but I believe it can make a very notable contribution to the maintenance of peace on this Pacific Ocean area. Fundamentally it is a fact finding body, providing an opportunity for interested people to get access to facts and to think out their significance. The institute realizes that it is not an "official" diplomatic body, and that it must refrain from every form and appearance of propaganda, but the putting out of facts is not propaganda, and so the institute is fully sensible to the need of scrupulous care with regard to the scientific accuracy of publications issued under the authority of the institute.

The conference provides a clearing house for ideas and an opportunity for personal contacts. Who knows, but that through its discussions, its influence on public thought and possibly on governmental action, it may indicate a road which if followed may lead to a peaceful solution of problems now fraught with grave danger.

I would like to close my direct reference to the institute by making a plea to the business men of Canada to take an interest in it and in what it is trying to do. The last conference was preponderantly academic, with the result in my mind—and I speak for myself alone—that stern realities, political as well as commercial did not receive their adequate weight in the course of the discussions. I do not want my academic friends to think that I am in any degree belittling the contribution they are able to make in the understanding and appreciation of public affairs. Their influence can be and is great. They probably know how to influence public opinion better than business men, but the danger arises when their opinions are formed without continual contact with men of affairs. Professors had at least as much to do with creating the atmosphere which led to the Great War as the operations of business men. The remedy is that students and business men should do their thinking together and in my mind the future utility of the institute will depend upon how far it succeeds in achieving this object.

CANADA'S INFLUENCE
And now a word or two about Canada and I'm through. I believe that the influence and example of Canada will count for much in the settlement of Pacific problems.

Every nation and civilization exists for the purpose of making a distinctive contribution all its own to the whole of human history, and the nature of our contribution is determined by circumstances.

ANGUS CAMPBELL & CO. LTD.
1006-10 GOVERNMENT STREET

Have YOU a "Lunch Counter" Husband?

MOST lunch-counter husbands are men who hate to upset home routine by being late for dinner. So when they're delayed at the office or stay overtime at the golf club they eat downtown.

But today such consideration is unnecessary. The up-to-date housewife serves her family meals at the regular time, while the latecomer's meal is kept piping-hot in McClary's.

HERMETITE

No danger of over-cooking. No scorching. He sits down to a real, home-cooked meal in the pleasant surroundings of his own family. The "stored heat" principle of McClary's Hermetite enables you to keep his dinner temptingly hot without using any more current. The door closes so tight that it makes the oven almost hermetically sealed—only a minimum of heat can escape.

Decide NOW to save the money he spends at lunch counters—to enjoy more leisure—to eliminate drudgery. McClary's all-white, porcelain-enameled electric range will bring to your kitchen economy, beauty, utility and sanitation such as you have never before experienced.

In the very style and size you require, at a price you can afford.

McClary's Electric Range

VICTORIA BRANCH—526 DOUGLAS ST. TEL. 6413

SPEEDIRON

McClary's Speediron Element is the greatest electric range improvement of modern times. Unlike old-fashioned elements, the coils of the Speediron are protected. "Boiling over", pots, kettles and drips cannot injure them. They are safe because they are protected by a removable, cast iron cooking surface. If coils burn out after long service, you simply lift the element out and have coils replaced easily and quickly—at the cost of a few cents.

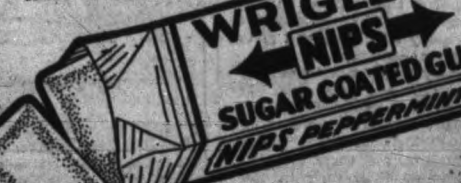

Ask your McClary's dealer to demonstrate this renewable, replaceable element.

For a Delightful Treat! Get WRIGLEY'S NIPS

A sugar coated gum that gives you double value! Peppermint flavored candy in the sugar coating and Peppermint flavored gum inside.

Delicious after smoking—it sweetens the breath, soothes tongue and throat and makes the next smoke taste better.

After Every Meal

I-ON-A-CO

"—don't hesitate, start treatments at once and be cured"

Such is the advice of this Victoria man who writes his personal testimony of the benefit he has received.

Victoria, B. C., August 12, 1927.

Dear Sir:—
I feel it is only fair to those who suffer that I should write you so that everyone should know the wonderful results that I have received through using the I-ON-A-CO Belt. My nerves were in a terrible shape, which affected my sleep, in fact, with loss of sleep and general condition, it was a great effort of will to force myself through the day's work, and 'twas daily getting worse. Now, to speak truthfully, I had heard of your Belt, but supposed it was a treatment necessitating undressing and going to considerable trouble. But I was getting into such a state that I finally started on treatments, and much to my surprise I found what a simple, delightful treatment it was. I did not have to even take my coat off, and also there was neither jar nor shock. I took treatment for four weeks steadily and with all honesty can say I am absolutely cured. My nerves are quite normal and I sleep regularly every night for at least eight hours. My whole system is toned up and I feel better and more ambitious than I have for years. My advice to anyone in pain is, don't hesitate, start treatments at once and be cured.

You may publish this letter as you wish, and let others know what a wonderful remedy the I-ON-A-CO Belt is.

I enclose my card and will be glad to give my personal testimony to anyone.

Yours very truly, H. G. G.

Man Faces Trial On Seven Charges

Barris, Ont., Aug. 23.—Late last night, following long arguments by counsel for the prosecution and defence, Magistrate Fish dismissed the charge of perjury against Joseph McDermott in the preliminary hearing of the Beeton cattle thieving case and adjourned the court till Tuesday next.

McDermott, the man who paid the \$10 to Alex Hodge on the night on which Dan Forsyth was killed by Hodge when attempting to rob him.

AUTOIST KILLED

Kellogg, Idaho, Aug. 23.—Jack Ranta, an employee of the Page Mine of this town, was instantly killed yesterday when an automobile he was driving went over a grade and into the Coeur d'Alene River, between Wallace and Arbutus, Idaho. Ed Hill, riding with him, jumped and escaped with bruises. Ranta was unmarried.

STANDARD APPRAISAL PLAN ADOPTED BY CITY FOR TAXATION VALUES

**Equalization of Taxation Burdens Aim of New Plan
Being Carried Into Effect With Adoption of Unit
Basis for Land Valuations, and Standard Scale for
Buildings**

The fresh appraisal of property within the city, one of the most important projects instituted this year by the City Council, is about one-third complete. The plan calls for the adoption of internationally followed methods of making valuation on a standard modern basis, and is being carried out by the City Assessor's Department with special assistance.

The revaluation, which will take a considerable time to complete, will result in a uniform method of appraisal, based on exhaustive data, and is likely to be widely followed by owners and others in arriving at the present value of property within a two-mile radius of the City Hall. Credit for the institution of the system is due to Alderman William Marchant, who for years advocated its introduction, and to Alderman H. C. Holmes and other members of the 1926 Council of Revision, sitting on the 1927 roll, who made the recommendation to the 1927 council, who put it into effect.

The work is being carried out under the direction of William Scowcroft, city assessor, with George Okell, assistant assessor, A. Gardiner and augmented staff, James Fairweather, independent valuator was specially engaged to help in the inauguration of the new system.

CHANGING CONDITIONS

The 1926 Council of Revision found property values were shifting to a marked extent, leaving city assessments in some cases inequitable through the rapidly changing conditions. The inflation of real property in the boom of 1910-12; the collapse of those values consequent upon the war; post-war depression share in by all Canadian communities alike; and taxation increments through reversions, all contributed to a deflating of values which shrank city-land figures from \$90,000,000 to one-third of that figure in the period 1912-1924. Three thousand parcels of land fell into city ownership in that period, narrowing the field of taxation for civic purposes.

In those years property values were

changing at such a rate that the assessor's department had an almost impossible task in trying to keep up with current values. Inequalities brought complaints, and complaints fostered emergency action, which awakened fresh protests.

STEADY RECOVERY

Then came the turn. Reversions slowed down, property values held, and in cases to commence their climb back. Steadily reducing taxation and incoming residents lent support to the return movement. Instances of which are seen in the Oak Bay and Fairfield districts in the last two years. This year property values experienced in the main a quiet and steady recovery of past of the ground level in the west end, while a phenomenal building year has led to advantageous sales.

It was to provide a just and fair appraisal of property for assessment purposes, and to equalize unwitting discrepancies, that the city undertook to prepare an entirely fresh valuation on the most modern basis possible. As a preliminary to this, a search was made for the best means of carrying the plan into effect.

As early as 1906, it was found, St. Louis had used a standardized form of assessment of buildings, based on classification and square foot factors of that classification.

The St. Louis plan has been improved upon and is now in general use throughout the continent. Also the adoption of a unit and front-foot basis of value for land has become generally recognized, and is in growing favor on both sides of the border-line.

JUST ASSESSMENTS

In arriving at what data is required on which to base a just and equitable assessment for taxation purposes, a great many factors are taken into account, this being particularly true of property held for business use. Prepared by James Fairweather, who is responsible for the assessment of the downtown area of the city, and who has given twenty years to the study of property appraisal, here are a few of the factors that enter into the consideration of the present worth of property:

MANY FACTORS NOTED

Personal inspection by the assessor or his assistant, who before making the inspection should have considerable information he can correct, verify, or augment; the condition of the city streets, whether above, below or level with the grade; the location of property, as to inside or corner lot, with or without view, protected from all extremes, the lot has access to one street, a street and a lane, or two or more streets; if lot has water frontage, and if suitable for development for shipping, street cars, railways, and the possibility of obtaining siding facilities.

EXHAUSTIVE DATA

The state of repair of buildings is also considered, as is their size, age, cost at date of construction, and approximately replacement cost; if the buildings are suitable for the neighborhood in which they are located; the previous assessments for several years back, and the reasons for any serious changes that may have occurred; the amount offered in good faith for the property, also the amount at which the property is held by the owner; the actual sale, and the different phases and conditions leading up to the sale, from both buyer and seller; the value of adjacent property, and the value of properties of precisely the same character situated in the same type of district elsewhere in the city.

Whether or not the property is so situated and improved to be of more value to some company or person other than the owner, is also taken into account; the mortgage amount carried on the property, the amount of insurance, and the amount carried on the books of the owners as to the value of the property; the gross and net income received from the property if fully occupied under ordinary conditions; testimony given before the Court of Revision or in any court, relating to the value of the property; the use of rule or scale for lots with greater or shorter depths, and on the particular parcel so that the same basis of calculations will apply all through the city.

Most important of all, continues Mr. Fairweather, an assessor must have the confidence of the owners, realtors, financial firms and contractors to the extent that they can rely on any information he may receive being treated as strictly confidential.

HISTORY OF EVERY LOT

When completed the system will be readily operated. A sales file will be kept on each property, showing its declared and assessed value. Also there will be kept a record in which is kept exhaustive data on the particular parcel of ground and its improvements, as well as on the block in which it is situated, its boundaries and improvements. The record takes in size and shape, location and use, neighborhood and declared sale value, as affected by location, vicinity, pedestrian and other traffic, degree of improvement, condition and age of buildings, rental or earning values. The past, present, and future are all taken into account, to show what tendencies are operating in the area, and to assist in arriving at present worth.

AT THE THEATRES

GLORIA SWANSON
AT HER BEST IN
"LOVE OF SUNYA"

Spectacular, beautiful and historic scene effects help make "The Love of Sunya" Gloria Swanson's first United Artists picture, which comes to the Dominion Theatre this week, the greatest photoplay in which the star has appeared.

The scenes in "The Love of Sunya" range from a poor man's hut to a rich man's mansion. There are reproductions of the famous Opera Comique, a temple in the Himalayan Mountains

Where To Go To-night

Capitol—"The Prince of Head-waiters."
Columbia—"Jim the Conqueror."
Dominion—"The Love of Sunya."
Playhouse—"The Romantic Adventures of Guy Fawkes."
Variety—"Mother."
Coliseum—Vaudeville.
Crystal—Garden—Swimming and dancing.

and striking scenes from Paris, New York and a small suburban city.

This wide variety of scenes is required because of the five characterizations Miss Swanson portrays in the photoplay. Three of these are played in America, one in France and the other in Egypt. She is seen in the incarnation of an Egyptian girl, centuries later she becomes a modern young girl. Next she is found in the characterization of the temperamental opera singer who captivates Paris. Then she portrays a school teacher and, finally, the wife of a millionaire.

Perhaps, the most interesting scenes to those who are familiar with Paris are the reproductions of the Opera

VARIETY

Comique in the French capital. Miss Swanson desired to make motion picture of this historic structure, for use in "The Love of Sunya," but officials explained they could not permit this. So the star had photographs made from which Hugo Ballin, noted art director, produced exact duplicates for the picture.

SPLendid TYPES
CAST IN VARIETY
FEATURE, "MOTHER"Youth must have its fling irrespective of the aftermath.
In the FBO production of "Mother," now showing at the Variety, starring Belle Bennett, there is a sequence showing Jerry Ellis, the seventeen-year-old son of Mary Ellis, bringing a score of typical "shells and shebas" to his home for a wild party while his mother was absent.James Leo Meehan, the director, went through a list of screen prospects to the number of 200 before making his final choice, and he certainly secured real types.
The gang is in the midst of a wild revel, during which they practically wrecked the house when Belle Bennett, the mother, arrives, sees her boy lying in a stupor and believes him to be drunk, but eventually learns it is from drink that the stupor comes.

She orders the gang from the house and when they have gone the realization that her boy has disgraced himself and her brings about one of the finest bits of acting that Miss Bennett has done for the screen to date.

William Bakewell is the boy and others having prominent roles include Crawford Kent, Joyce Cook, Charlotte Stevens and Sam Allen.

"Mother" is suggested by Kathleen Norris's story and was adapted to the screen by Dorothy Yost.

ACTION SUPPLIES
FAST MOVING PLOT
TO COLUMBIA FILM

A bit of tense, heroic atmosphere of the famous "Message to Garcia," broad, side-splitting comedy and high-tension melodrama in the colorful setting of a little South American Republic, supply Maurice (Lefty) Flynn with a splendid vehicle in "Heads Up!" at the Columbia Theatre this week. The story takes the part of a wealthy young man who is handicapped and incidentally annoyed, by too many servants. In a desperate attempt to rid himself of what most persons would consider the height of luxury he answers an advertisement for a young man to go on a "secret mission" and after many hair-breadth escapes finds himself mixed up in a series of oil revolutions in Centralia. George B. Seitz received a token of appreciation from the city fathers of Flagstaff, Ariz., recently, in the shape of a ten gallon Stetson hat. Seitz, who filmed parts of "The Last Frontier," and "Fate in Paradise" in and around Flagstaff, went to that town seeking new locations for "Jim the Conqueror." The following day a box was received by Seitz and when he unpacked it a gigantic sombrero was uncovered, together with a letter from several city executives and big business men of Flagstaff who appreciated the distinction Seitz has won for the town. William Boyd and Elliot Fair have the featured roles in this Peter B. Kyne story, which will be shown at the Columbia Theatre all week. Tully Marshall, Walter Lang and Thomas Santschi are cast in their support.

CHILDREN FLOCK
TO PARTICIPATE
IN "GUY FAWKES"

During the filming of the Stoll Picture Production, "Guy Fawkes," now showing at the Playhouse, a number of school children were required to dance round a bonfire at the Cricklewood studios and generally to make merry. Something went wrong, however, and a retake was subsequently considered necessary. Such an adventure, five months in front of November 5, appealed to the kiddies, and when it was learned that the scene would be repeated the next day while the work is under way, sales of business properties have gone through in recent months at substantial gains, and this is true also of some of the most desirable residential areas. When this is covered the city will be in possession of a complete record of the history of every property, but experts feel that the need for current appraisal will be continuous to meet generally rising values.

LEWIS STONE IN
UNUSUAL ROLE AS
BIG TOWN WAITEROne of the outstanding dramas of the season, "The Prince of Headwaiters," with Lewis Stone, Priscilla Bonner, Lilyan Tashman, Ann Rort, Robert Agnew and E. J. Ratcliffe heading a remarkable cast, is the feature photoplay at the Capitol Theatre this week.
If you have a desire for genuine entertainment, you will enjoy "The Prince of Headwaiters." The story is unusual in its dramatic angles. The outstanding character is Lewis Stone as Pierre, the headwaiter of the Ritz in New York.
The photoplay is Jane Murtin's adaptation of the Garret Fort story, "The Prince of Headwaiters," which was directed "Flaming Youth" and other First National hits, is the director.

E. Rort, producer of "Ponjola," "Old Loves and New," "The Blonde Saint" and "The Notorious Lady" and other features for First National Pictures, produced "The Prince of Headwaiters." It is his outstanding picture of the year, and one which no true lover of the screen can afford to miss. In addition to the regular picture attractions being offered at the Capitol Theatre this week, are three perfect vaudeville attractions, including, Avar, the macabre soloist de Luxe, Wm. Degan, the eminent basso, who has been held over for another week's engagement by the management of the Capitol Theatre, and is offering an en-

tirely new programme of song selections, and the headline presentation of the Bennett Sisters, a trio of clever artists from the famous Fanchon and Marco Review, in a novel wrestling boxing and athletic demonstration. This presentation was greatly applauded last night by the delighted Capitol audiences, and was voted extremely good, and something new in the way of vaudeville turns.

STANDARD APPRAISAL
PLAN ADOPTED BY CITY
FOR TAXATION VALUES

(Continued from page 5)

values bear a qualified ratio to the hourly foot-traffic past the door of the property. Traffic counts have been taken on repeated occasions to ascertain how the public moves, and it is found that people follow display windows in the retail section to the extent of crossing and recrossing a street two or three times in as many blocks. As a rule double the number of people go past a corner than by similar premises in the middle of a block. The "corner instance" extends to about 100 feet on either side of the corner, where property benefits from double streams of traffic. Highway traffic has little importance as regards retail trade, except as it leads to street car stops, parking stands, and places at which such traffic comes to rest.

BRIGHT LIGHTS ATTRACT
Traffic counts of pedestrian traffic on Government, Yates, Douglas and Fort streets, showed that "window shopping" is a popular pastime with the public on Saturday afternoon. The counts did not alter its ratio, the pedestrian streams being monotonously regular in their perambulation. The sun drawn or repulsed the crowd, depending on the season of the year, it is found, while at night bright lights attract people as well as moths.
In approaching its work the assessor's department made a study of land revaluations, where the bulk of these had occurred, and investigated the actual cause wherever possible. In some cases the cause was found to be overholding of speculative land, or the holding of land developed ahead of its day, and in others it was found to be the incidence of taxation in the days when that figure was generally increasing instead of decreasing as it is to-day.SHIFTING VALUES
An instance of how an entire area can be affected by conditions that might seem remote at first, lies in the inner northwest section of the city. The change in the value of the land made Douglas street the street car route into town. The destruction of Rock Bay bridge cut off a considerable volume of pedestrian and highway traffic. The opening up of a street with rail and water facilities on the Industrial Reserve slowed up the future of the older area as a commercial extension of the city proper. The latter condition also affected Wharf and Store Streets, though these, it is stated, will one day be important commercial thoroughfares.CHINATOWN SHINKING?
Yesterday, the assessor's staff elicited, Chinatown proper had contained a much larger population than it does to-day. This reduction is caused through return of Chinese laborers to China, and a lessening of the rate of influx from the Orient. The same tale is told in trading license fees and, police taxes collected from Chinatown. Chinatown has a fluctuating population based on the sawmill, cannery and other seasonal operations.Another feature of the assessor's staff was the condition of Johnson Street following the opening of the new bridge. The traffic that followed was commercial, higher than the residential movement, giving the street a potential future value rather than the immediate overnight appreciation that was anticipated would follow the improved bridge.
While the change-over to the new system was still in course of being made the assessor's staff had the completed work. In between times the assessor's staff prepared a new roll book, and made plans to take care of the change of addresses required for the annual preparation of the voters list.STEADY IMPROVEMENT
While the new system of appraising is now in effect, the actual valuations that must follow will take two years more to complete. It is anticipated. Much of the property within the half-mile circle has been covered, but outlying districts will take months of review before they are brought under the plan.
Lessening reversions and improving sales are the two main tendencies noted by the assessor's staff while the work is under way. Sales of business properties have gone through in recent months at substantial gains, and this is true also of some of the most desirable residential areas. When this is covered the city will be in possession of a complete record of the history of every property, but experts feel that the need for current appraisal will be continuous to meet generally rising values.

THIEF SENTENCED

Trail, B.C., Aug. 23.—Samuel V. Rowley yesterday pleaded guilty to entering a local home on the night of Oct. 10 and stealing money and valuables. He was given two concurrent sentences of six months each.

Tender, Aching,
Swollen Feet

In Just Five Minutes Those Sore, Tender, Aching Feet Get Amazing Relief—Moore's Emerald Oil Is Guaranteed.

Go to MacFarlane Drug Co. or any good drugstore to-day and get an original bottle of Moore's Emerald Oil. The very first application will give you relief and a few short treatments will thoroughly convince you that by sticking faithfully to it for a short while your foot troubles will be a thing of the past.

Don't expect a single bottle to do it all at once, but one bottle will show you all the question that you have at last discovered the way to solid foot comfort.

Remember that Moore's Emerald Oil is a clean, powerful, penetrating Anti-septic Oil that does not stain or leave a greasy residue and that the very first bottle must give complete satisfaction or your money cheerfully refunded.

BASEBALL, BOXING

Swimming Gala Will Be Held Labor Day At Crystal Garden

Victoria Amateur Swimming Club Arranges For Annual Championship Gala

Seven B.C. Titles at Stake; Many Fine Swimmers From Mainland Expected

Arrangements have been made by the Victoria Amateur Swimming Club to stage their annual gala at the Crystal Garden on Labor Day, September 5.

Up until last year the V.A.S.C. held their annual gala at the Gorge, but last summer they discontinued their outdoor events and shifted their quarters to the Crystal Garden.

Jack McNeill, president of the club, and his many energetic assistants, are busy getting together all the local swimmers and divers and grooming them for the gala.

They are also delegating the Mainland swimming clubs with requests that all the stars there be sent across.

Many titles at stake. No less than seven B.C. championships will be at stake at the gala and the competition should be extremely keen.

For many years Victoria held the upper hand when it came to swimming, but recently the Mainland has developed a number of very fine young swimmers who have been forcing the locals to the limit to hold their superiority.

The big attraction of the gala will be the water polo game between Victoria and Vancouver for the provincial championship. The local team won the title last year after it had remained on the Mainland for some time.

The events at the gala will be as follows:

Fifty yards, breast stroke, boys under fifteen.
Fifty yards, breast stroke, girls under fifteen.
Ladies' 100 yards B.C. championship, free style.
Men's 100 yards B.C. championship, free style.
Junior men's 100 yards, B.C. championship, free style.
Ladies' 200-yard relay intercity championship.
Men's 200-yard relay B.C. championship.

Men's fancy diving, three metre, B.C. championship.
Ladies' fancy diving, one metre B.C. championship.
Men's plunge for distance.
Ladies' plunge for distance.
B.C. water polo championship, Victoria vs. Vancouver.

LAWN BOWLING

Games are being speeded up on the Burnside Lawn Bowling Club this week to make room for some extra events in connection with the visit of the British team on September 3.

To-morrow there will be a tournament open to all ladies and gentlemen, members and non-members.

Nominal prizes will be awarded, and the entry fee will be devoted to the club-contribution towards the cost of the international match. A similar tournament will be held on Saturday, at which everybody will be welcome.

A partial lighting scheme has been installed to enable members to play games in one evening instead of two, as is now done.

Result of the league games played last Saturday at Beacon Hill were:

R. V. Mills, P. Johnston, R. Dewar, A. Stewart, R. Renwick, E. Skipp, 17 skip, 21.
M. Macdonnell, F. Moulton, H. M. Wright, W. Tugman, J. McCosh, A. Skipp, 24 skip, 18.
Total, 41.

Horse Racing

Vancouver, Aug. 23.—Making every dog a winner, Red and Grey gelding, owned by Mrs. O. Mahan and ridden by Harris, won the mile and an eighth event, fourth on the card at Lansdowne yesterday afternoon.

Style, with Colman, in easy Kettle Lou third. Harris took his mount into the lead from the barrier and was never in danger.

The results were as follows:

First race—Claiming, purse \$500; three-year-olds and up; five furlongs: 1. Snively, \$11.45; 2. Silver Star, \$4.25; 3. Stanford, \$2.50. Time, 1:19.

Second race—Purse \$500; Western Canadian bred; three-year-olds and up; six furlongs: 1. Kingmaker, \$5.45; 2. Goddess of Liberty, \$4.70; 3. Van Loo, \$2.25. Time, 1:25.

Third race—Claiming, purse \$500; three-year-olds and up; one mile and one eighth: 1. Pledge, \$15.45; 2. Galleta, \$4.50; 3. Kitty Lou, \$2.70. Time, 1:47.

Fourth race—Purse \$700; Granville Claiming Handicap; five and one-half furlongs: 1. Pennon, \$5.25; 2. Puro Dye, \$2.75; 3. Tatters, \$2.40. Time, 1:21.

Fifth race—Claiming, purse \$500; three-year-olds and up; six furlongs: 1. Chief Clerk, \$9.20; 2. Brian Kent, \$4.50; 3. Tatters, \$2.40. Time, 1:21.

Sixth race—Claiming, purse \$500; four-year-olds and up; one mile and one eighth: 1. Lady Pinnell, \$11.40; 2. Nantucket, \$2.25. Time, 1:47.

Seventh race—Claiming, purse \$500; three-year-olds and up; six furlongs: 1. Chief Clerk, \$9.20; 2. Brian Kent, \$4.50; 3. Tatters, \$2.40. Time, 1:21.

Seventh race—Claiming, purse \$500; three-year-olds and up; six furlongs: 1. Chief Clerk, \$9.20; 2. Brian Kent, \$4.50; 3. Tatters, \$2.40. Time, 1:21.

Boston Braves Are Wrecking Hopes Of Cubs, Cutting Lead

Chicago Lost Third Straight Game to Club Which Annual Upsets Contenders

Yankees Lose to Cleveland and Detroit Take Two Games From Washington

Day by day the pennant race in the National League is getting tighter and tighter. The Boston Braves, notorious hope wreckers of championship aspirations, yesterday drubbed the pace-setting Chicago Cubs for the third time in succession, and while the New York Giants and the Pittsburgh Pirates were idle, the St. Louis Cardinals were pulling up to within one game or second place.

The Cubs had a lead of only 2½ games to-day, and a very few more reverses would throw the first division situation into a jumble that might not be straightened out until the very last game of the season. Yesterday the usually reliable Cub defence cracked at the crucial moment. Boston came out on top of a five-to-three score.

Ed Brown, Boston outfielder, made a National League record when he played in his 34th consecutive game.

WON WITH HOMERUN. Chick Harley's homer in the second inning was the only score made in the St. Louis-Philadelphia game. Haines and Ulrich staged a pitchers' battle. It was Haines' twentieth victory of the season. He has been defeated only seven times.

The Giants, Brooklyn and Cincinnati were idle.

Cleveland made it three straight from the Yankees, winning 9 to 4. Babe Ruth hit his fortieth homer of the year and became one up on Gehrig, who went hittingless in the first time this year any team had made a clean sweep of a series against the Yankees.

DETROIT WINS TWO MORE. Detroit ran their winning streak of thirteen games, taking both ends of a double-header from Washington and St. Louis. The Tigers won 7 to 3 and 6 to 1.

The Boston Red Sox and the St. Louis Browns were idle.

AMERICAN LEAGUE. R. H. E. New York..... 4 8 1 Cleveland..... 9 10 0 Batteries—Moore, Shocker and Collins; Grabowski, Shaute and Sewell.

First game—R. H. E. Philadelphia..... 3 10 2 Chicago..... 6 7 0 Batteries—Quinn Johnson and Cochran; Lyons and Crouse.

Second game—R. H. E. Washington..... 2 5 0 Detroit..... 4 8 1 Batteries—Hadley and Ruel; Gibson and Shea.

NATIONAL LEAGUE. R. H. E. Chicago..... 3 7 4 Boston..... 5 12 1 Batteries—Carlson and Hartnett; Werter, Robertson and Urban.

St. Louis..... 1 4 0 Philadelphia..... 0 6 0 Batteries—Haines and O'Farrell; Ulrich and Wilson.

Only games scheduled.

Tenth race—Purse \$400, three-year-olds and up, one and one-half furlongs—Daddy Wolf, \$31.50; \$9.50; \$4.00; Gloriana, \$3.45; \$2.75; Old Lady, \$4.10. Time, 1:28. Also ran: Was in Bags, Shasta Boy, Cusqueva, Light.

Eleventh race—Purse \$400, three-year-olds and up, one and one-half furlongs—Daddy Wolf, \$31.50; \$9.50; \$4.00; Gloriana, \$3.45; \$2.75; Old Lady, \$4.10. Time, 1:28. Also ran: Was in Bags, Shasta Boy, Cusqueva, Light.

Twelfth race—Purse \$400, three-year-olds and up, one and one-half furlongs—Daddy Wolf, \$31.50; \$9.50; \$4.00; Gloriana, \$3.45; \$2.75; Old Lady, \$4.10. Time, 1:28. Also ran: Was in Bags, Shasta Boy, Cusqueva, Light.

Thirteenth race—Purse \$400, three-year-olds and up, one and one-half furlongs—Daddy Wolf, \$31.50; \$9.50; \$4.00; Gloriana, \$3.45; \$2.75; Old Lady, \$4.10. Time, 1:28. Also ran: Was in Bags, Shasta Boy, Cusqueva, Light.

Fourteenth race—Purse \$400, three-year-olds and up, one and one-half furlongs—Daddy Wolf, \$31.50; \$9.50; \$4.00; Gloriana, \$3.45; \$2.75; Old Lady, \$4.10. Time, 1:28. Also ran: Was in Bags, Shasta Boy, Cusqueva, Light.

Fifteenth race—Purse \$400, three-year-olds and up, one and one-half furlongs—Daddy Wolf, \$31.50; \$9.50; \$4.00; Gloriana, \$3.45; \$2.75; Old Lady, \$4.10. Time, 1:28. Also ran: Was in Bags, Shasta Boy, Cusqueva, Light.

Sixteenth race—Purse \$400, three-year-olds and up, one and one-half furlongs—Daddy Wolf, \$31.50; \$9.50; \$4.00; Gloriana, \$3.45; \$2.75; Old Lady, \$4.10. Time, 1:28. Also ran: Was in Bags, Shasta Boy, Cusqueva, Light.

Seventeenth race—Purse \$400, three-year-olds and up, one and one-half furlongs—Daddy Wolf, \$31.50; \$9.50; \$4.00; Gloriana, \$3.45; \$2.75; Old Lady, \$4.10. Time, 1:28. Also ran: Was in Bags, Shasta Boy, Cusqueva, Light.

Eighteenth race—Purse \$400, three-year-olds and up, one and one-half furlongs—Daddy Wolf, \$31.50; \$9.50; \$4.00; Gloriana, \$3.45; \$2.75; Old Lady, \$4.10. Time, 1:28. Also ran: Was in Bags, Shasta Boy, Cusqueva, Light.

RETIRE FROM RING TO GO TO COLLEGE

Four years ago Labarba went to the Olympic Games as a member of the United States boxing team. Soon after returning he wanted to go to college, but had no funds. He turned to professional boxing and won the world's flyweight championship. He has earned sufficient money to marry and go to college. He will appear in his last ring engagement to-night against Johnny Vacca.

Key Schee Races To Popular Win, Taking Richest Meet Purse

Smith Gelding Best in Classy Field, Running in Prince of Wales Handicap

Royal Party Sees First Race; Shamrock Flower Pays Best Price, \$16.05

Willows Race Track, Aug. 23.—Key Schee, a fine-looking chestnut gelding, won the Prince of Wales Handicap yesterday after a spirited run over six and one-half furlongs. The horse was nearly backed off the boards and was one of the hottest favorites to go to the post at either the Colwood or Willows meetings. As a result the prices paid on Key Schee were very small. A straight ticket was worth \$3.50; place \$3.50, and show \$2.00.

The race thrilled the fans as it drew some of the best thoroughbreds at the track. The purse of \$600 was the richest of the meet. Starter Neary got the horses away from the barrier without any fuss and they kept closely bunched. Key Schee jumped into the lead at the three-quarter pole and held out to the wire. Goldie II gave the fans the real thrill of the race. On the first time past the judges' stand he was last, but Tippon, who had a leg up on him, settled him into his stride, and he rapidly overhauled the field, coming into the stretch well up. In a determined drive to the wire Tippon almost caught Key Schee, but Jockey Pollard urged the favorite to another effort, and he lasted to win by less than a length. Goldie II, Lucky Hays and Shasta Grassy finished well together, a nose and a head separating the three of them.

PRESENTED WITH CUP. The fans gave Jockey Pollard and Key Schee a big hand when they reported at the judges' stand. Mrs. Carl Fendray, wife of the Mayor, presented the Prince of Wales Cup to A. E. Smith, owner of Key Schee.

His Royal Highness, the Prince of Wales, accompanied by his brother, Prince George, and members of his staff, visited the race yesterday, accompanied by His Honor the Lieutenant-Governor. They watched the first race.

BEST PRICES. The best price of the day was returned by Shamrock Flower in the sixth race over the mile and seventy yards. Each straight bet of two dollars was worth \$16.05. Keala had practically all the public's confidence and money, but could not match strides with Shamrock Flower and lost the decision by two lengths. Black Pat won third position easily. Ed Wallace, the second choice, set the pace for the race, but was forced to pay out at the last two turns and carried Keala with him. Shamrock Flower came through and ran away from his field in the home stretch.

Rainbow, in the first race, was the only other horse to pay double figures to-day. He placed in the opening race to pay \$13.25.

LEAD ALL THE WAY. Hugging the rail throughout, Fulanti, carrying the blue colors of the Norris stable, got under the wire first in the opening race, paying \$5 to win, \$2.10 to place and \$1.40 to show. After opening up a gap soon after the start, Fulanti held it until the stretch when he began to tire and was just able to turn up long enough to beat out Rainbow by a neck. The latter entered the stretch in fifth position but with a fast closing run, nearly won. Black Pat and Peter Pierson ran like a wonder pony toward the finish and the rapidly overhauled him, finishing second. Chevalier led all the way until the stretch when he was forced to give in to Black Pat and Peter Pierson on the run to the wire. He took the show money. Ucan, the favorite, was pinched off at the barrier and ran up against another stack of hard luck when she had to go overland for the first round. She finished last.

HIS SECOND WINNER. Bringing home his second winner in two consecutive races, Balentine rode Salton to an easy victory in the third race. Taking the lead soon after leaving the barrier, he was never in danger and won with three lengths to spare. He was second favorite and paid only \$6.50 to win. Helen Test, the first choice, was unable to get going and finished in seventh position. Southern Gentleman, finishing with a fast rush, secured the show position and rewarded his third place backers with \$17.75 for every \$5 invested.

Snatching the lead in the stretch from a few yards from the wire, Ping Pong won by a neck in the fourth race. He moved up entering the stretch, passed the tiring Ocan Bell and was just able to leap past Tulamene. Keala, Ocan Bell and Tulamene all made the early running and the latter held on well to get second honors. Yorkshire Maid moved quickly in the stretch, but was not in the running. She was third favorite, and Sir Edward were not dangerous, although the former showed speed just after the breakaway.

SEVENTH RACE. In the seventh race, winning by four lengths and paying \$2.25 on straight tickets, Balentine gave his mount an easy ride, and it made his third winner of the day.

DRESS TOWN FOR PROVINCIAL FAIR

Flags and Bunting Should be Displayed Generally Throughout City

Large Numbers of Visitors in Town For Occasion and Other Parties Coming

The decoration of the city with flags and bunting during the period of the Provincial Fair week is urged by Mayor J. C. McEwen, who draws attention to the large number of visitors in town for the occasion, and the arrival on Saturday of a large party of United Kingdom newspapermen on a tour of Canada.

Wednesday will be Citizens' Day at the fair with special crowds anticipated as a result of the general half holiday. The City Hall will close at 1 p.m. to-morrow, and as many of the employees in the city services as can be spared will be given a free afternoon in which to take in the exhibits at the fair.

STAMPEDE OPENS TO-NIGHT AT FAIR

"Strawberry Red" Will Offer Wild West Show at Willows Exhibition

The feature evening entertainment programme at the Willows Exhibition will this year take place in the Horse Show Building, where "Red" Wall and his cowboys and cowgirls will present a real wild western Stamped. The programme will commence at 8 o'clock, and will include demonstrations of jumping, horsemanship by men and women, trick roping and riding a comedy mule which all are invited to attempt to ride, a chariot race and broncho riding.

Obituary

Donald Stevenson Came to Canada Half-Century Ago

There passed away on Monday evening at his residence on Cedar Hill Road, Donald Stevenson, aged eighty-one years. The late Mr. Stevenson was born in Scotland and came to Canada a young man of twenty years, and lived for many years at Douglas, Manitoba, before coming to Victoria in 1918. He is mourned by his wife, Miss Catherine Stevenson, with whom he resided. For many years he was an elder of the Presbyterian Church, and for the past eight years of Knox Church, Victoria. Burial services will be held on Thursday afternoon. The cortege will proceed from McCall Brothers to the church for service at 2 o'clock, after which interment will be made in Royal Oak Burial Park.

NEWS IN BRIEF

Employees of Oak Bay Municipality will enjoy a full day's holiday to-morrow. The council has proclaimed a holiday so the staff will have an opportunity to visit the Provincial Exhibition at the Willows.

Miss Marjorie Watson, daughter of C. E. Watson of South Saanich, who sang over KOMO, Seattle, yesterday afternoon, will again be heard on KOMO to-morrow evening at 11 p.m.

The swimming pool and showers of the Y.M.C.A. have been closed for complete renovating. The Y.M.C.A. Building will be completely redecorated in the near future.

The executive of the Vancouver Island Fox Breeders' Association will meet shortly to decide whether the show to be held in the fall will be open to all entries besides those received from Vancouver Island. Dr. MacDonald of Everett has requested this on behalf of the Everett breeders who wish to compete. After raising has met with great success in the Everett district.

Wednesday, August 24, being Citizens' Day at the exhibition, the Post Office arrangements will be as follows: Money order and registration tickets will close at 1 p.m. General delivery and stamp tickets will close at 5.30 p.m. The morning carrier deliveries only will be made. All mail to be deposited will be made up as usual. The Post Office lobby will be open as on ordinary work days.

Bernard Lambert, a former member of the Christian Endeavor Society of St. Paul's Presbyterian Church, Esquimalt, who went out to China several years ago as a missionary with the China Inland Mission, made an unexpected reappearance in St. Paul's Church on Sunday evening. He was invited to the pulpit by the pastor, Rev. J. B. Patterson, and spoke impressively on the text, "I will give praise unto Jehovah." On Monday evening he also gave a message to the Young People's Society of Christian Endeavor.

On the Blotter

A bright boy of fifteen, well-spoken and cheerful, needs a job badly. He has three smaller brothers and sisters and a mother who has no means of support. His father is in hospital. His name is Alfred Cornwell. Deputy Chief of Police Henry O'Leary and detectives of the Victoria Department were trying to find something for the youngster to do this morning. He came to them as a last resort.

Clement O'Brien, eighty-three, a veteran of the Fenian raids, is quartered temporarily at the police station. He has no other home. For forty years this old soldier lived alone in a cabin at Sooke. Recently he was in hospital and an aged man, but he was discharged from both at his own request because he was unhappy there.

Magistrate George Jay, on brief vacation at northern inland points, is expected in this city Friday to resume his duties at the city hall. Meanwhile, James Forman, J.P., is acting in his place.

Constable Henry Jarvis has solved the problem of home chores which annoy officers in off duty hours. He has a wonderful German police dog which carries wood, brings in the paper, brings him his slippers, minds the baby, guards the house and he is hoping to be able to teach it to split kindling and wash the dishes.

MACLEON PRAISED BY BUSINESS MEN

Comment on Premier's Accession to Office Uniformly Favorable

Vancouver, Aug. 23.—Comment on business men and others interested in public affairs upon the accession of Hon. J. D. MacLean to the office of Premier is uniformly favorable. His experience in several departments of the Government, his proven administrative ability, his integrity, his tact and his general high respect that he has won throughout the Province, were all commended upon by a number of representative citizens interviewed here.

"He was John Oliver's personal choice," was the comment of Charles Woodhead, M.P.P. "The Bureau and the city's most successful pioneer merchants, and anybody who has given the matter any thought must realize that he is the logical man. He will have my support. For twenty years I have been intimately acquainted with the late Premier Oliver, and I have always had the highest regard for his sterling and wise. In choosing Dr. MacLean as his successor I think he made the best possible suggestion."

"W. J. Blake Wilson and Chris Spencer both expressed the highest respect for Hon. Dr. MacLean, whose personal friendship they had enjoyed for a number of years.

"Dr. MacLean knows his job," said W. H. Main, president of the leading wholesale house which bears his name. "I believe my own personal respect for his business ability is universally felt throughout the business community."

"Although Dr. MacLean's politics run in a different line from my own, I know him very well and consider him a high class man," remarked J. J. Banfield.

A SAFE MAN

"Dr. MacLean is a safe and sane administrator," declared W. Roy McIntosh of the Kelly-Douglas firm, who has advised the Minister of Finance and has merited the promotion to a higher office and a greater responsibility. I wish him every success in the confidence that he is eminently qualified to succeed."

As to who has shouldered a somewhat similar public responsibility for almost the same period of time as Dr. MacLean has in his position, Mr. MacLean has no doubt. Mr. MacLean, chairman of the City Finance Committee, said he had admired the skillful manner in which Dr. MacLean had handled the department. Alderman Almond expressed his congratulations to Dr. MacLean on having been chosen as Premier of the Province. He mentioned that he was well qualified for the post.

Robert McKee, President of the Vancouver Board of Trade and prominent in the export trade, said he had a high opinion of Dr. MacLean's business and administrative ability, as exemplified in the departments that he has administered during the last ten years.

WILL AND STRENGTH

MacLean's long period of association with the Education Department may tend to bring this important phase of our public administration more into the foreground of Government. Mr. MacLean, chairman of the Vancouver School Board, said that it will be a good thing for the whole of British Columbia. I have known Dr. MacLean for many years, and have a high opinion of his ability and qualifications for the high position he has now assumed. I believe he will do something for the province in his new position, and will prove a sound and capable leader."

"He was the natural choice," said A. MacCormack. "He ought to be in the cabinet. He will feel the loss of John Oliver. He is a hard man to follow, but he is the best choice that could have been made. He has a good knowledge of the work of most of the departments."

Pictures of Oliver Funeral at Capitol

Moving pictures of the funeral of the late Hon. John Oliver, taken during the obsequies on Saturday last, are being shown all this week at the Capitol Theatre.

These pictures are being shown in addition to the other screen and vaudeville features.

Members of Prince's Party Enjoy a Day's Fishing at Brentwood

Three members of the party visiting Victoria with the Prince of Wales journeyed to Brentwood on Sunday to try the fishing, and they had exceptionally good luck. The party hooked twelve nice salmon, including one weighing thirty pounds. The visitors were really delighted with the salmon trolling and were extremely delighted aboard the launch when the big fellow was hauled in.

Capt. Lancelotti, Hon. Piers W. Legh, A. S. Pitts and H. G. Dabry fished from the launch of Capt. Lancelotti. Capt. Lancelotti, who is private secretary to the Prince of Wales, had the time of his life hauling in the thirty-pounder. He voted it great fun and proudly exhibited the catch to the many other boats on the arm.

General Panel, T. O. McKay and Roger Monthie were the other guests of H. E. Coerman aboard the launch. Gen. Panel also had good luck, hooking a twenty-pound salmon.

EXPERT TALKS ON ENGLAND'S FUTURE

Great Problems Face Great Britain, Says Kenneth Lindsay, B.A.

In his address on "The Political and Economic Conditions in England," given at the Girls' Central School Union, the speaker of the University Extension Association, Kenneth Lindsay, B.A., enunciated England's greatest and most pressing problem as that of keeping 40,000,000 people alive.

The speaker saw but three possible solutions of this difficulty: either by exporting more goods, producing more foodstuffs, or by promoting extensive emigration.

In speaking of the first possible solution, Mr. Lindsay pointed out the keen trade rivalry between all nations, citing especially the instance of the growth of Japanese influence in Oriental markets, and the enlargement of the merchant marine of France, Italy and the United States. Moreover, owing to the slump in all trades since the Great War, the latter fleets have less merchandise to carry, he said. While speaking of shipping, the lecturer mentioned the fact that on account of the ever-increasing use of oil as fuel for steamers, British coal is in demand.

Mr. Lindsay placed more hope in the second remedy for the food problem in the Old Country. At present, agriculture in England is in general, he asserted, in a most inefficient way, he asserted. In some districts the tenure of land has changed very little from that practiced in the days of Queen Elizabeth, and the soil is cultivated in an unscientific and unprogressive class of peasant tenants, whose squires landlords are "too poor to even mend their fences." That England could grow more food, he said, was a fact, but in the line of vegetables and dairy produce she could easily triple her output. Nevertheless there is a movement afoot to form colleges for the scientific study of agriculture, and regard to making inventories of tillable land and estimating the possibilities of farming. Mr. Lindsay spoke very highly of the surveys that were being carried on by the Labor party.

The possibility of cutting down Great Britain's breadline by encouraging emigration is receiving some little attention, he says. There are three training sections in England in which prospective emigrants are able to obtain some knowledge of the rudiments of farming. There is also a sum of money set aside to help along the settlers in their new homes.

The lecturer dealt for some time on the living conditions in England, showing how the masses are suffering from the abuses inflicted on them by the industrial revolution, with all its disfigurement to human life. He expressed public is rather ignorant, and in many cases the children are incapable of being taught, owing to physical untidiness, he declared. Of those who attend school, ninety per cent leave at the age of fourteen, while less than ten per cent receive high school instruction, and only one in 1,000 goes to university. The speaker stressed the fact that fourths of fourteen nearly all went to swell the ranks of unskilled labor. The subject of birth control was touched upon, and in the Women's Branch of the Labor Party the women voted 29 to 1 in favor of voluntary municipal advice on this question.

CALIFORNIA WILL SEND LEADERS OF INDUSTRY TO CITY

George I. Warren Returns Full of Enthusiasm For Pacific Trade Parley

Enthusiastic over the prospects for a second convention of the Pacific Foreign Trade Council in Victoria next month, George I. Warren, Publicity Commissioner, has returned from California where he went on business of the convention. Incidentally Mr. Warren set what is probably a record for speedy traveling over the long distance. He left San Francisco at 5 o'clock Wednesday morning. Returning by way of Anacortes and making stops at Redding, Cal.; Roseburg, Ore., and Longview, Wash., Mr. Warren reached Victoria at 10 o'clock Saturday night. He traveled an average of 260 miles a day.

ADDRESSED TRADE BUREAUS

Mr. Warren conferred with the directors of the Foreign Trade Bureaus and those located in Seattle, Portland, Oakland, San Francisco, Los Angeles and San Diego. He addressed the meeting of the Foreign Trade Bureau of the San Francisco Chamber of Commerce and the Foreign Trade Club of that city, pointing out the importance of the convention which will be held in Victoria.

President Wilson of the Foreign Trade Club of California, appointed a committee consisting of Harry S. Scott, O. E. Hydes, Aubrey Drury, William C. B. Hubbard, James D. Sauter and J. Frederick Richardson to co-operate with a committee of the San Francisco Chamber of Commerce consisting of Frederick J. Koster, E. W. Wilson, Guy T. Slaughter, T. Noel Perry, Mott, F. F. G. Harper, Paul Dietrich, Stanley Posen, William H. Taylor, Wesley O. Ash and E. A. Parker to take charge of San Francisco's participation in Victoria's convention.

This committee held several conferences with Mr. Warren and assured him that San Francisco would send at least 100 delegates to the convention. At Los Angeles he addressed the Los Angeles Foreign Trade Club which organization also appointed a committee to stimulate interest at that city in the approaching convention.

Mr. Warren held conferences with committees appointed by the San Diego Chamber of Commerce, the Oakland Chamber of Commerce and the Portland, Oregon, Chamber of Commerce. O. E. Fischer, president of the California Manufacturers' Association, has circulated every member of that organization, calling attention to the convention and inviting them to attend. It is expected that at least 200 delegates from the State of California will attend the convention and come north in a special train which is now being arranged for in the south.

"All along the coast interest seemed to be centred in the necessity of the Pacific Coast, as a unit co-operating in the foreign trade matter, with a view to world trade expansion through increased production, industry and commerce," said Mr. Warren.

LEADERS TO ATTEND

Mr. Warren was accorded a very cordial reception at every place he visited, and a most generous response was made to his invitation to attend the convention. Among the commercial men in California, whom he interviewed, the following definitely registered to attend: Robert Dollar, president, Dollar Lines; Mr. Harding, vice-president, Oakland Bank; Wm. d'Elbert, manager, Foreign Trade Club of the Union Gas Engine Company; O. S. McPherson, executive manager of the San Diego Chamber of Commerce; William S. Smallwood, general manager of the Oakland, California, Chamber of Commerce; E. W. Wilson, president of the Pacific National Bank; Fred J. Koster, past president, California Manufacturers' Association.

The committees appointed in the different cities are already at work arranging the personnel of the delegations and, from general appearances, the Victoria convention promises to be the best Pacific Foreign Trade Convention ever held.

YOUNG CHINAMAN FACES TWO CHARGES

Alleged to Have Attempted to Rob Quadra Street Store

Charged with attempting to rob a store on Quadra Street at about 2.30 o'clock this morning, Mar Charlie, a twenty-year-old Chinese, was arraigned in the City Police Court this morning. James Forman, Justice of the Peace, remanded the accused until next Saturday when it is expected Magistrate George Jay, at present on vacation, will hear the case. The accused Chinese was not represented by counsel, and did not plead.

Early this morning a disturbed sleeper telephoned to police headquarters stating that someone "was prowling about." A. H. Napper's store at 2714, Quadra Street. Constable Arthur Bishop sent to investigate, returning with Mar Charlie.

Recently detectives in tracing a stolen watch were looking for a man who robbed Mr. Napper's premises on July 18. The watch discovered and the second-hand dealer who purchased it was the man who sold the watch to him. Consequently two charges were laid against the Chinaman this morning.

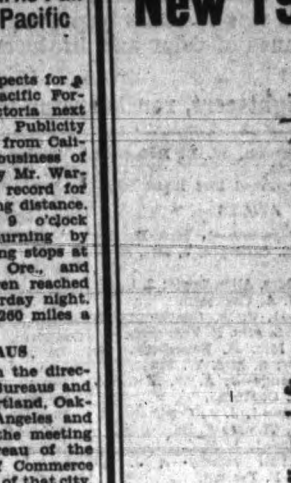

In search of quotas to make up Victoria's allotted numbers in the harvest fields this year, the Employment Service of Canada have had to depend on the outlying districts. Saanich, particularly, has furnished most of the total of 250 workers who have taken advantage of special fares to the grain-growing territory of the West. In every case the men left with letters of acceptance from farmers for whom they harvested before. In supplying harvest help, the local office keeps in touch with a central exchange at Winnipeg, learning from day to day what the requirements are in the fields. Hop picking will create the next general call for workers, this time for British Columbia fields.

Mr. Lindsay said there is a new England spring from the ashes of the old, an enthusiastic, vital England, waiting for a chance to show itself.

The lecture was followed by questions and discussion. C. C. Fuller officiated as chairman. A vote of thanks was moved by Prof. R. S. Parr, of Victoria College.

ROGERS BATTERYLESS RADIO RECEIVING SETS

New 1928 Models at the Exhibition

The Last Word in Radio!

Sensation of every exhibition this year, the new Rogers, batteryless sets for 1928 are on display at Fletcher Bros. Booth at the Willows. If you have even the slightest inclination to purchase a radio set this Winter, don't fail to see this wonderful set. It is the only true batteryless set on the market, and the new 1928 models embody improvements that will add 50% to radio enjoyment. Three models.

TEMPLE OF MUSIC AT THE EXHIBITION

Enjoyable Feature in Main Building; Princes Were Interested

When the Prince of Wales and Princess George entered the Main Building at the Exhibition yesterday they were received with the National Anthem and "O Canada," the strains of which reverberated so powerfully throughout the place as to suggest that somewhere a large band was concealed. The music, however, came from the exhibit of Fletcher Brothers in the centre of the building, where four Victor Orthophonic Electrophones were operating on one current. The Royal visitors devoted considerable attention to this ingenious device, as well as to the exhibit generally. The exhibit, designed by P. Balgano, of Fletcher Brothers, is being modeled after a classic temple, in colors of blue and gold. The Electrophones are stationed directly beneath a dome which is supported by pillars of marble effect, the dome acting as a sounding board. On the exhibit are also shown Orthophonic radios, and a piano, all of which were produced in Canada. From this "Temple of Music" pours forth in sonorous tones a varied programme every afternoon and evening, much to the enjoyment of visitors to the building.

Provincial Exhibition Objective of Citizens

Gay throngs featured the first day at the Provincial Exhibition yesterday at the Willows, when one of the largest crowds on record turned out to witness the displays which had merited the attention of Royal patronage. The first impression of the crowds was the vast improvement in the arrangement of the buildings, which, gaily decorated, presented moving scenes of color and life as crowds thronged around the exhibits and grouped about the demonstrators.

Children, ever the most ardent sightseers, ran laughing and dancing about the booths of the "joy zone,"

and insisted on rides on everything that moved or could be coaxed to support a group of kiddies. The gaiety of the crowds lent a holiday appearance to the scene which presented an animated picture as over 3,000 people made their way about the buildings and through the grounds.

The attendance on the opening day swelled under the stimulus of the visit of Prince Edward and Prince George to a figure approximately twice as large as the number attending the average opening day at the Provincial Exhibition. The exact number attending, according to officials, was 3,012, compared to 1,625 in 1920.

PRINCE HAS PRAISE FOR CITY ENTRY

Willows Exhibitors Make Brave Show in Record Time
Prize Awards Announced in Fruit Sections

The Willows Exhibition got off yesterday to a flying start, with a record attendance for an opening day. The exhibits were more complete than has been noted on the second day of the fair. In the main building this advanced condition was especially notable, the district exhibits from Richmond and Victoria, with the hundreds of items required, being rivalled for completeness by the splendid arrays of flowers, fruits and vegetables displayed upon the long tables by individual competitors.

This readiness evidently proved pleasing to the Prince of Wales, during his inspection of the horticultural section, his approval causing him to stop a moment upon arriving at the Victoria district exhibit. E. M. Whyte, of Alberni, a director of the exhibition, happened to be standing by the Victoria entry, and His Royal Highness asked "Is this your entry?" Mr. Whyte disclaimed credit, though admitting assistance. "Well, it is very nice," commented the royal guest, as he shook hands.

WINTER SEASON SHOWN

The fruits on display shown the unusual character of the season, according to the judges. Although the exhibition is a week later than last year, the exhibits are fully three weeks behind the maturity of similar entries in last year's show. While this works to the disadvantage in color of late fall fruits, it has enabled soft fruit growers to show berries such as have not been entered at the "Willows in the history of veterans."

A substantial amount of judging in the fruit and vegetable classes was achieved yesterday afternoon and evening. The judges are F. W. Ankell

Jones, G. Robinson, W. H. Robertson and E. W. White.

Results announced last night were:

APPLES

Yellow Transparent—1, Mrs. B. Fagerberg; 2, Alex. Gillespie; 3, Mrs. A. C. Rutan.

Duchess—1, Mrs. Alice Doyle; 2, C. W. Thornton; 3, J. A. Coatham.

Gravenstein—1, J. A. Coatham; 2, Alex. Gillespie; 3, Mrs. B. Fagerberg.

Wealthy—1, Mrs. B. Fagerberg; 2, Mrs. H. Bristow; 3, Mrs. A. W. McClure.

Blenheim Orange—1, A. W. McClure & Son; 2, J. A. Coatham.

Red Astrachan—1, J. A. Coatham; 2, A. E. French; 3, Charles A. Ramsford.

Cullin Pippin—1, J. A. Coatham.

Any other Fall variety—1, J. A. Coatham; 2, A. E. French.

Collection four varieties fall apples, five each—1, J. A. Coatham; 2, Alex. Gillespie.

WINTER APPLES

King—1, J. A. Coatham; 2, D. H. Heyer; 3, A. W. McClure & Son.

Grimes Golden—1, J. A. Coatham; 2, C. W. Thornton; 3, A. W. McClure & Son.

Northern Spy—1, J. A. Coatham; 2, Mrs. B. Fagerberg; 3, Alex. Gillespie.

Ontario—1, D. H. Heyer; 2, Mrs. B. Fagerberg; 3, J. A. Coatham.

Yellow Newton—Mrs. B. Fagerberg.

Wegener—1, D. H. Heyer; 2, C. W. Thornton.

Jonathan—A. W. McClure & Son.

Delicious—1, Mrs. B. Fagerberg; 2, J. A. Coatham.

Snow—1, J. A. Coatham; 2, Mrs. B. Fagerberg; 3, Mrs. A. C. Rutan.

Cox's Orange—1, Alex. Gillespie; 2, J. H. Robinson; 3, Mrs. J. Strutt.

Golden Russet—1, Mrs. B. Fagerberg; 2, Charles A. Ramsford; 3, J. A. Coatham.

Rome Beauty—J. A. Coatham.

Bellflower—1, D. H. Heyer; 2, J. A. Coatham.

Mcintosh—1, J. A. Coatham; 2, Alex. Gillespie.

Stark—1, J. A. Coatham; 2, A. W. McClure & Son.

Canada Renette or E.C.—1, J. A. Coatham; 2, A. W. McClure & Son.

Wintergreen—J. A. Coatham.

York Imperial—2, J. A. Coatham.

Greening—1, J. A. Coatham; 2, Alex. Gillespie; 3, A. W. McClure & Son.

Green—1, A. W. McClure & Son; 2, J. A. Coatham.

Winter Bananas—1, J. A. Coatham; 2, Alex. Gillespie.

Any other Winter variety—1, J. A. Coatham; 2, A. W. McClure & Son; 3, Alex. Gillespie.

Collection 6 varieties, Winter apples, 5 each—1, J. A. Coatham; 2, Mrs. B. Fagerberg; 3, Alex. Gillespie.

PEARS

Collection by individual growers, 5 varieties, 5 each, Fall varieties—J. A. Coatham.

Bartlett—5-1, J. A. Coatham; 2, J. P. Sarlat; 3, F. Sere.

Beurre Bousquet—5-1, J. A. Coatham.

Beurre Bonnet—5-1, J. A. Coatham.

Flemish Beauty—5-1, J. A. Coatham.

Beurre Hardy—5-1, J. A. Coatham.

Louise Bonne de Jersey—5-1, Miss A. King; 2, J. A. Coatham; 3, Chas. A. Ramsford.

Any other Fall variety—1, J. A. Coatham; 2, A. E. French.

Collection four varieties fall pears, five each—1, J. A. Coatham; 2, Alex. Gillespie.

PLUMS OR PRUNES

Best collection, 6 varieties, individual growers, 12 each—J. A. Coatham.

Pond seedling, 12-1, Mrs. B. Fagerberg; 2, J. A. Coatham.

Damson, 12-2, W. O. Burch.

Pacific, 12-3, J. A. Coatham.

River's Black Diamond, 12-1, Mrs. B. Fagerberg; 2, A. W. McClure & Son.

Fallenberg or Italian prunes, 12-1, J. A. Coatham.

Burkum, 12-2, A. W. McClure & Son.

Maynard, 12-3, J. A. Coatham.

Reeve's Seedling, 12-1, J. A. Coatham.

Any other variety plums or prunes, 12-1, F. Sere; 2, Mrs. B. Fagerberg; 3, J. A. Coatham.

PEACHES

Crawford, early or late, 66-1, J. F. Sarlat; 2, Andrew Wood; 3, Mr. McKnight.

Elberta, 6-1, J. H. Robinson; 2, D. H. Heyer.

Any other variety—Mrs. E. W. Darcus.

GRAPES

Black—1, George Schofield; 2, F. Hinkman.

QUINCES, CRABAPPLES, ETC.

Orange, 5-J. A. Coatham.

Crabapples, Transcendent, 12-1, J. A. Coatham.

A. Coatham; 2, Mrs. Alice Doyle.

Crabapples, Hyslop, 12-1, J. A. Coatham; 2, Miss A. King; 3, Mrs. Alice Doyle.

Crabapples, any other variety—1, Miss A. King; 2, J. A. Coatham.

BERRIES, CURRANTS, DRIED FRUITS, ETC.

Blackberries, evergreen, best plate—1, Mrs. C. Price; 2, Mrs. J. Strutt.

Blackberries, Snyder—Chas. Stapleton.

Blackberries, Eldorado, plate—Mrs. G. Burton.

Blackberries, Himalaya, plate—1, L. A. Campbell; 2, Thos. A. Deveson; 3, Lily M. DeLaid.

Loganberries—1, L. A. Campbell; 2, Mrs. E. W. Darcus; 3, Thos. A. Deveson.

Raspberries—1, G. Little; 2, J. H. Robinson; 3, Angus McKay.

Best display berries, any variety—2, Mrs. E. W. Darcus; 3, C. S. McTavish.

Currents, white—1, T. E. Astley; 2, Mrs. E. W. Darcus.

Currents, red—1, T. E. Astley; 2, Mrs. E. W. Darcus; 3, Mrs. A. Davey.

Currents, black—1, C. S. McTavish; 2, Mrs. E. W. Darcus.

Best display, currents—1, T. E. Astley; 2, Mrs. E. W. Darcus; 3, G. S. McTavish.

Walnuts, black, plate—J. A. Coatham.

Walnuts, English—1, T. Walker; 2, J. A. Coatham; 3, Alex. Gillespie.

Walnuts, Japanese, plate—1, J. A. Coatham; 2, Alex. Gillespie.

Geeseberries, pint—1, T. E. Astley; 2, Mrs. E. W. Darcus.

ART AWARDS MADE AT WILLOWS FAIR

The art exhibits at the Willows Fair yesterday afternoon and evening attracted the attention of hundreds of visitors to the upper floor of the Women's Building. The collection is declared to be the best of the type ever gathered at Victoria. The entries are unusually numerous, many visitors found difficulty in selecting works of most interest in the various classes.

Prize awards announced last night were:

OIL COLOR (ORIGINAL)

Open

Landscape or marine—Winnifred Durrant.

Still life, fruit, flowers, etc.—Mrs. Mary A. Higgins.

WATER COLOR—CRAYONS, ETC.

Open

Portraits or figures—Oliver A. Trick.

Landscape or marine—Mrs. E. C. Learther.

Still life, fruit, flowers, etc.—Mrs. Mary A. Higgins.

Pen and ink drawing, freehand—Dorthea Scott.

Portrait in crayon or pastel—B. Moore.

COMMERCIAL ART

Open

Posters—Constance Wilson.

Lettering—Selma M. Hogarth.

OIL COLOR (ORIGINAL)

Amateurs

Landscape—1, Miss Bainbridge Smith; 2, Mrs. A. Jack.

Marine—1, Reginald Nairne; 2, H. C. Edwards.

Still life, fruit, flowers, etc.—Winnifred Durrant.

WATER COLOR (ORIGINAL)

Amateurs

Life study portrait or figure—A. M. D. Fairbairn.

Landscape—1, Mrs. E. C. Learther; 2, Mrs. Gouch.

Marine—1, A. M. D. Fairbairn; 2, Mrs. E. C. Learther.

JUDGE ADOPTS NOVEL POLICY

Women's Work Shown at Willows Bears Pithy Comment by Judge

The Women's Building at the Willows Exhibition yesterday adhered to the record of past years, every entry being in place and in readiness for the judges before the afternoon commenced. The display is of remarkable interest this year, the merit of the entries being enhanced by a novel procedure by the judge of women's work, Miss K. Morrison.

As each class is graded, Miss Morrison jots down, on a slip of paper, a few words of explanation as to the reason for the award given and pins this comment upon each article. These slips are read with tremendous interest by the visitors.

The following awards were announced last night:

BRITISH COLUMBIA WOOL

White wool, fine spun, 1/4 lb.—1, Miss Hilda Harris; 2, Mrs. J. Brethour.

White wool, medium, 1/4 lb.—1, Mrs. J. Brethour; 2, Miss Hilda Harris.

Sock wool mixture, 1/4 lb.—1, Mrs. Brethour.

Best collection wool, plain colors, 1/4 lb.—1, Miss Hilda Harris; 2, Miss McPherson.

Best collection mixture, 1/4 lb.—1, Mrs. J. Brethour; 2, Miss McPherson.

Warp and wool weaving, 1/4 lb.—1, Mrs. W. H. Clarke; 2, Miss McPherson.

Bag knitted—1, Mrs. W. H. Clarke.

Bag embroidered in wool—2, Dorothy Macaul.

Wool shawl—1, Miss Hilda Harris; 2, Mrs. A. S. Innes.

Knitted shawl, Shetland Islands pattern—1, Mrs. A. S. Innes; 2, Miss Innes.

Knitted under vest lady's—1, Mrs. Robertson; 2, Miss Robertson.

Child's jumper and knickers—1, Mrs. Arnold.

Child's dress—1, Mrs. Jessie Brethour.

Bonnet in rabbit wool—1, Mrs. L. Schwartz; 2, Mrs. Dennis Harris.

Boys' Jersey and cap—1, Mrs. Dennis Harris; 2, Mrs. Stanley Robson.

No LAMINEX Door Has Ever Failed

The most rigid tests, that would ruin ordinary doors, have proven that Laminex Doors can never warp or come apart; that Laminex Doors are absolutely unaffected by climatic conditions.

YOUR WALLS AND CEILINGS ARE BETTER WITH

GYPROC

With GYPROC you have a wall that is highly fire resisting. It stops travel of sound—makes quiet, restful rooms. It is also a splendid insulating material. As GYPROC can be papered, alabastined or paneled beautiful effects can be obtained. The cost of GYPROC is exceedingly low due to tremendous production.

New Record Established By Fair Exhibits

Manufacturers and merchants, stock raisers and tillers of the soil, men and women from every walk of life on Vancouver Island and the British Columbia Mainland have come to represent their callings or particular specialty with exhibits at the annual Fair at the Willows. Some of the most remarkable products of Island farms are on display this year. Experts have voiced their approval of the agricultural entries. Where the industrial

exhibits are grouped there is indication of a wider and more complete system of manufacture, bigger and better products, and many more than heretofore. Merchants have surpassed themselves to make their displays attractive, and they have, according to all authorities, well succeeded. The splendid displays in the various buildings are sufficient indication of the success of the exhibition.

ART AWARDS MADE AT WILLOWS FAIR

(Continued from page 10)

Animals from life — 1. Mrs. E. C. Easther; 2. E. Verrill.

Which Took Vancouver
By Storm—

THERE will be real jubilee attractions for you at the Victoria Fair this week when the 4X Bakeries are reproducing a booth which for novelty and interest drew record crowds at the Vancouver Exhibition.

A Free Concert and Picture Show

Presented from a miniature stage is something original and so entirely different that you should not, under any circumstances, miss.

Following each short show samples of the new 4X Cookies will be given away—we would like you to taste them and give your opinion.

Come and bring your children and friends.

Time Was When Every Day Was Work Day for the Average Days of Drudgery Housewife are now Days of Freedom

TODAY, modern science has eliminated the need for household drudgery. Thanks to the aid of modern Gas and Electrical Appliances, every woman has it within her power to keep herself fit and free to meet her wifely obligations.

Visit our booth at

The Provincial Exhibition

and let us show you how you, too, may have this freedom.

Here you will find the latest in Vacuum Cleaners, Electric Ranges, Electric Refrigerators, Washing Machines, Table Appliances, Gas Ranges, Gas Fires, Gas Central Heating Systems, etc.

We hope to have the pleasure of a visit from you sometime during the Exhibition.

B.C. ELECTRIC

The accompanying photograph illustrates the service held at the War Memorial in Parliament Square on Sunday, when ex-service men paid tribute to the memory of soldiers, sailors and nurses who fell in the Great War. The service was arranged by the combined ex-service organizations of Victoria. Members of Maple Leaf Post No. 21 of the American Legion and representatives of local ex-service organizations participated. Standing at the base of the memorial is the Rev. R. T. Leighton, who conducted the service; H. F. Thorpe, secretary of the Fro Patria branch of the Canadian Legion, and Charles P. Morisset of the American Legion.

NEW BEACH HOTEL HANDSOME EDIFICE

New Apartment Block For Fort Street Planned by H. E. Munday

Builders Active on First of Fall Programme as Fine Weather Holds

Williams, Terrie & Williams have secured the general contract for the erection of handsome new hotel for Beach Drive on the waterfront at Oak Bay, to be built to the order of the Beach Hotel Company, of which Capt. William Merton is the leading spirit. The plans were designed by Ralph Berrill. Contracting for the plumbing and heating goes to R. Smith, and the electrical work to Fox & Mainwaring. The total cost is given at approximately \$50,000. The completion date is set at February 28, 1928, with the official opening planned for April in that year. The building will be "L" shaped, of Tudor design, of two stories and basement with stucco exterior. The lower course will be veneered with brick, and

story to a second to contain further bedrooms.

The walls and partitions will be double studded and lined to make them sound proof. Provision is made for adequate extensions in other wings, when required. Servants' quarters will be provided in the basement, with accommodation for automatic fuel oil heating. The lounge will have a broad beamed ceiling and an immense open fire place. Several of the rooms will have fire places.

A twenty-room stucco and frame apartment block at 1331-7 Fort Street is to be erected to the order of H. E. Munday. A permit taken out at the City Hall this week to cover the work places the estimated cost of construction at \$60,000.

Last week building permits closed at the City Hall with \$17,000 as the value of new work under way during the six-day period. This week that figure will be exceeded, it is anticipated, as a wireless message from George P. MacKenzie, officer in charge, received by the Department of the Interior to-day.

VICTORIA, B.C., TUESDAY, AUGUST 23, 1927

Automobile Show Attracts Wide Interest

All the outstanding developments of the year in the automobile industry will be seen by those who visit the Provincial Exhibition this week.

Every motor dealer in Victoria has the latest models in his line on view.

Motorists will witness many improvements and changes in the 1928 cars.

The automobile exhibit has always proved one of the main events at the annual exhibition here.

Patrons always take great interest in looking over the attractive displays of the automobile manufacturer.

Dealers exhibiting at the exhibition are: Atkinson Motor Company, Begg Motor Company, Brechin & Morrison, H. A. Davis Limited, A. W. Carter, Consolidated Motor Company Limited, Dinamore Brothers, A. E. Humphries, Eve Brothers Limited, Jameson Motors Limited, McRae-Meldrum Motors, National Motor Company, Thomas Plimley Limited, Corbett & Holmes, Masters Motor Company Limited, and Hutchinson & Buss Limited.

The automobile exhibit is open every day from 10 o'clock in the morning until 10.30 o'clock in the evening, and is situated in the first building to the right on entering the fair grounds.

STUDEBAKER MAKING NEW SPORT ROADSTER

Erskine Six Four-passenger Model Will be Ready For Delivery in Short Time

A new four-passenger Erskine Six sport roadster, with a novel and distinctive body design, has been put into production at the Detroit plants of The Studebaker Corporation and will soon be available for delivery, according to an announcement received from the factory by Jameson Motors Limited, local Studebaker-Erskine distributors.

Equipped with wire wheels and finished in lustrous Columbia River Blue lacquer, with hood panel and trimmings of green, this latest addition to the Erskine Six line is expected to meet with immediate popularity.

Every line of the new roadster suggests its exceptional speed and flexibility as well as its all-around desirability as a smart sport car. Its folding top with natural wood bows and nickel-trimming, and its sharply tilted windshield, accentuate the Erskine's distinctive European lines.

Upholstery in the deeply cushioned driver's seat and in the comfortable rumble seat in the rear deck is of genuine duotone olive leather.

The equipment is unusually complete, including self-energizing four-wheel brakes; bumpers, front and rear; an extra wire wheel; nickel-plated windshield wings; coincidental lock to steering and ignition; hydrostatic gasoline gauge on the dash; Atlanta radiator ornament; automatic windshield

AUTOMOBILE BUILDING AT WILLOWS FAIR GROUNDS

cleaner; two-beam headlights; rear vision mirror and left fender mirror. Engineering data on the new roadster, released by Studebaker's 800-acre proving ground, indicate that the new model is a brilliant performer. Speed of sixty miles per hour; acceleration of five to twenty-five miles per hour in eight-and-a-half seconds, and climbing ability which enables the Erskine Six

to master eleven per cent grades in high gear, are some of its capabilities. The low swags body, cradled on a spring base equal to more than eighty-two per cent of the wheelbase, gives the car exceptional roadability and riding comfort, which, coupled with the power and economy of the Studebaker designed motor, sets a new standard of light car performance.

PEERLESS WILL SOON HAVE NEW MODELS

The Peerless Motor Car Corporation will shortly announce new 1928 models, according to word just received from the factory at Cleveland. The changes that have been made are said to be refinements for the most part, lower bodies, greater comfort, more luxurious upholstery. New color combinations in duotone lacquer, exquisitely finished hardware of brushed silver are among the improvements that rumor says will be included in the new line.

The Peerless factory has been running at top speed for the past six months, shattering the biggest production records that have been set up during Peerless's twenty-five years of manufacturing history. Sales of Peerless cars in 1927 are expected to exceed 1926 figures by a wide margin.

Three of the new strip maps now in preparation by the Automobile Club of British Columbia are expected to be off the press by the end of the current week. One covers the highways from Vancouver to Hope, the second from Hope to Pelly, and a third from Lytton to Herby. The next series will include the Kamloops area. The entire province will be similarly mapped as rapidly as the work can be turned out.

More Deliveries — and at less cost!

THE Harley-Davidson Package Truck is "first through traffic" — dependable — amazingly inexpensive in operating cost — can always be moved into a small space at the point of delivery.

Use this time-saving, money-saving delivery for extending your trading radius, increasing phone orders, building customer goodwill.

NEW BUILDING FOR NEW YORK

Cadillac Distributors in U.S. Metropolis Erecting Home to Cover 350,000 Square Feet

Construction has begun in New York City of one of the largest unit plants of any automobile distributor in the world. It is the new Uppercu Building being erected by the Uppercu Cadillac Corporation, New York distributors of Cadillac and LaSalle cars, at a cost of \$2,500,000.

The new building will occupy the entire block front on Columbus Avenue, from Sixty-second to Sixty-third Street. It will be thirteen stories high and have a total floor area of 350,000 square feet. The roof alone has a floor area of 28,100 square feet, providing additional space for the repair and testing of Cadillac and LaSalle cars.

Concepts of the huge project is credited to Ingles M. Uppercu, president of the Uppercu Cadillac Corporation, who has had a part in the selling of Cadillac cars ever since the production of the first one-cylinder model twenty-five years ago.

Within the building walls will be housed all of the activities of the Uppercu Cadillac Corporation in Manhattan, including the sales department, showrooms, executive and other offices, new car storage department, parts and accessory department and the service department where cars are thoroughly overhauled and renovated.

The three lower floors will be devoted to sales and administration. Here will be space to put on an independent automobile show of eighty or ninety cars. There will be every new method to guide the customer in his selection. The eleven upper floors will be used for maintenance. There will be many special features which will be of unusual interest to automobile owners — innovations which will result in quicker service. There will be sound-proof rooms for testing cars for quietness of operation, machines for duplicating road conditions, a complete blacksmith shop, a miniature proving ground, and many other unique features.

The open department will be a veritable body factory. There will be an upholstery shop, enamelling rooms, paint rooms, Duco room — where any type of finish can be applied to an automobile.

The parts and accessories department will occupy an entire floor and will be connected with all parts of the

building by a battery of four dumb-walkers.

UNUSUALLY THOROUGH

The mechanical department will be unusually thorough in its equipment and organization. Not only will there be all the customary facilities, but there will be a number of new improvements never before conceived in the history of maintenance. Flooded with daylight, airy, well ventilated, with showers in the wash-rooms and a frigidaire drinking water system, the shops will be conducive to careful craftsmanship. A distinct innovation is to be a cleanliness process—whereby motors will be turned over to mechanics clean and fresh. Getting them in this condition will not only make the work easier but it will encourage a greater pride in the work.

The basement has been specially designed as a receiving service floor reached by ramps located along the rear walls of the building.

The primary object in planning this expensive new structure is to afford a centralized plant — where under one roof all the work in connection with the selling and maintaining of motor cars will be carried on — eliminating waste motion and lost time.

The building will be what is known as strictly fireproof. Among the novel features will be a pneumatic tube system for rapid dispatching of orders; the latest type of electric call systems

are to be installed on all floors; an independent interior telephone and telegraph system.

High-speed elevator equipment is provided, serving all floors and basement, including large automobiles and passenger elevators on the sixty-second Street side, other large automobile and passenger elevators on the Sixty-third Street side and two automobile elevators at approximately the centre of the back wall of the building. At the main entrance on Columbus Avenue, there are to be two passenger elevators, making a total of eight elevators in the building.

With every branch showing an increase, membership of the Automobile Club of British Columbia is growing at a phenomenal rate. On August 15 this year there was a total of 3,545 members as against 6,649 at the same date in 1926.

The itinerary of the directors' delegation from the Automobile Club of British Columbia to tour the interior and visit club branches was announced to-day as follows: August 28, leave Vancouver; August 29, Kamloops; August 30, Vernon, Kelowna; September 1, Penticton; September 2, Grand Forks; September 3, Nelson; September 4, Cranbrook.

Three directors and manager will make the trip by motor.

We Announce Improvements Lower Prices

The public expects motor car manufacturers to keep abreast of the times, and to make their product constantly better. We are earnestly striving to do so.

You will find improvements, applying to both bodies and chassis, in all of the latest Paige sixes and eights now on display. And you will find ten of the twenty Paige models selling at lower prices.

New color combinations, applied by an advanced process, add to the appearance of the cars, and to the durability of their finish.

We invite you to inspect these latest Paige cars, to consider their value, and to enjoy a demonstration.

Latest Models Are On Display At Willows

Latest models in twenty-eight different lines of automobiles are on display at the automobile exhibit at the Provincial Fair. The models include all types which are the last word in motor manufacture.

Much has happened in the last twelve months to make the year a notable one in automotive progress.

One of the outstanding developments of the year is the improved silence of the 1927-28 car and its freedom from vibration. On a number of 1927-28 models engine noise and vibration have been insulated from the car by mounting the engine on rubber supports.

The external appearance of the new cars has been improved by the most careful study of body lines, and in many cases standard colors have been selected to set the lines off to the best advantage.

In most cases great effort has been made to bring the interior furnishings up to that degree of luxury suggested by the beautiful upholstery.

Makes of cars on display at the show include: Brooks' steamer, Cadillac, Chandler, Chevrolet, Chrysler, Dodge, Erskine, Essex, Ford, Hudson, Hupmobile, Lincoln, Locomobile, McLaughlin-Buick, Morris, Nash, Oakland, Oldsmobile, LaSalle, Packard, Paige, Peerless, Pontiac, Reo, Star, Studebaker, Whippet and Willys-Knight.

LIGHT BEAM NOW USED BY OAKLAND

Instruments, once confined to the laboratories of the scientists, are now found as every day working tools in some of the finer automobile factories, so exacting have become their measurement and fit requirements, in

their endeavor to whip vibration and lengthen the life of wearing parts. With higher standards have come closer limits of fit and balance. The ten-thousandth of an inch supersedes the thousandth and the thousandth replaces the hundredth which has necessitated new scientific instruments to gauge the finer limits and assure the results expected.

One among the many scores of scientific devices used in measuring the close limit operations in Oakland Six factories is the crankshaft vibration balancing machine, an instrument

which uses a light beam under octagonal prism glass to measure the unbalanced condition and to indicate its location and amount at any point on the crankshaft.

For years the light beam has been used for experimental work in fine limits in the scientific laboratories because a light beam will pass through the most minute opening—a opening which can neither be seen nor determined by any other type gauge.

Thus as the crankshaft spins in its testing machine, the operator detects the exact point where the vibration is set up and by grinding a few minutes of steel from the point indicated brings the crankshaft into almost vibrationless travel.

This balance testing instrument is a development of the General Motors Research Division and the Oakland Division is pioneer in its use in factory production.

Some idea of the ruthless demand of engineers for more severe limits may be appreciated when it is told that thirty-three operations in Oakland Six engine parts are rigidly held within three ten-thousandths of an inch, thirty operations with five ten-thousandths, more than 10 within one-thousandth and more than 200 within two-thousandths of an inch.

AIR TRIP BY MINISTER

Toronto, Aug. 23.—Commander Richard Byrd, well-known air pilot, will fly from New York to Toronto on Wednesday, bringing with him Maurice Bokanowski, Minister of Commerce, Industries and Aviation of France. The French Minister was delayed in sailing to attend the meeting of the Canadian Bar Association here and as a dinner has been arranged by the Ontario Government for Wednesday in his honor, it will be necessary for him to start by aeroplane as soon as his ship docks in New York in order to be here on time.

BALTIMORE NOW HAS MOTOR AMBULANCES

Four Studebakers Owned by City Provide Service For Thousands of Residents

Although the majority of Canadian and United States cities have gone to great lengths in organizing motor transportation for fire and police departments, the city of Baltimore, Md., is the first to install a complete and separate automotive ambulance service. The recent adoption of this service has caused considerable discussion among civic and life insurance executives and Baltimore officials have been rewarded with much favorable comment for their foresight.

More than a year ago the city of Baltimore purchased a Studebaker ambulance. This was put in operation in conjunction with central fire companies and police stations. So satisfactory was the service, that city officials decided to install an ambulance service adequate to meet the demands of the entire city.

As a result of this decision three new Studebaker Bellevue ambulances were recently added to Baltimore's automotive equipment. To-day the four Studebakers are the basis on

which the entire ambulance service is founded. This service is most complete and far reaching in its work.

The ambulance call number has been printed on the covers of Baltimore's new telephone directories. A direct wire has been laid between police and

fire department headquarters. A policeman on any of Baltimore's streets may summon an ambulance by merely telephoning from a corner patrol box. The same arrangement applies to fire alarm boxes.

MOST EFFICIENT
Studebaker Bellevue ambulances, such as Baltimore prizes so highly, are powered with the famous Studebaker Dictator six-cylinder motor, which mounted on the 146-inch Bellevue

chassis, makes this vehicle the most powerful of its weight and size in the world. Hospital authorities have pronounced it the most efficient ambulance built to-day and Baltimore officials have expressed a similar opinion.

STUDEBAKER

Made in Canada

Be Sure to See the Car That
Created a World's Record

5,000 Miles in 5,000
Minutes

ALL other endurance records are swept into oblivion by the amazing performance of the Studebaker Commander—5,000 miles in 5,000 minutes! Ten world's records were established at one time.

But the best test of a Studebaker Commander Sedan is what the car will do in your own hands. In no other way can you appreciate why the Commander has been called by one authority "the greatest post-war achievement of the automotive industry."

The Commander Regal Sedan, which will be on display at the Auto Show, is powered with this incomparable new motor, and it is

equipped with a supreme beauty of finish that is the final word in quality and luxury.

With supremacy in power and beauty, this new Studebaker gives a greater standard of safety—the safety of a full vision steel body, fused by electricity into a unit, practically indestructible—positive mechanical four-wheel brakes, and the finest steering mechanism ever devised.

Aristocrat of the Small
Car Field

STUDEBAKER'S

ERSKINE SIX

The European type car that proved the sensation of Paris and London shows. It is a fine quality small car, as aristocratic in appearance as it is democratic in price. At the same time the Erskine Six meets every requirement

of a big car with none of a big car's expense—and reduced expense wherever you drive. At the Auto Show this week, see for yourself what a small car of fine quality really can be!

Newest Ideas In Construction and Finish

Construction and finish of the latest models on display at the automobile show will be a source of great interest to the average automobile owner.

H. A. Davis Limited, in the showing of 1928 Buick models, has a stripped chassis of one of the new cars so that all the main parts can be seen by the visitor.

The new Dodge four, claimed to be the fastest four in North America, is on view in the exhibit of A. E. Humphries Motors Limited.

Dodge Brothers' Big Six, a new addition to the line, is also being shown.

One of the largest displays of the show is that of Thomas Plimley Limited. Models of the latest Packard, Chrysler, Willys-Knight and Whippet models are on parade.

The Essex Super Six models shown by A. W. Carter offer all the newest improvements in motor car construction.

In the Begg Motor Company's exhibit are included splendidly finished models of the Chevrolet, Nash and LaSalle.

The new Star models, with a completely rubber insulated motor and many other features, are shown by the Atkinson Motor Company.

Masters Motors Limited has on display the latest Jubilee Oldsmobile models. Long, low, sweeping lines feature the bodies on these cars.

A feature of McRae-Meldrum display is the new all-Canadian Oakland two-door sedan.

Hupmobile and the Reo Flying Cloud, noted for speed and easy handling, are shown by the Consolidated Motors Limited.

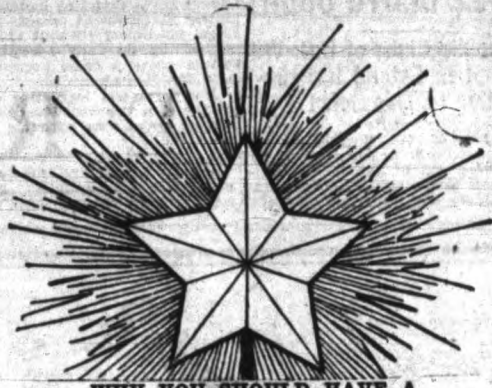

The only English car in the exhibition, the Morris, is shown by Brechin & Morrison.

Erakine models, with their smart appearance and low graceful lines, are displayed by Jameson Motors Limited.

Eve Brothers Limited have on display the latest Paige and Chandler models.

A complete line of Ford models is on display by the National Motor Company.

MOTOR WITH TWO KICKS INVENTED

Bostonian Completes New Internal Combustion Engine Giving Double Stroke

A Boston man has completed what he terms an "internal combustion engine," claims it gives two strokes in a single cylinder per revolution of the shaft.

"The gas is sucked in at the bottom of the cylinder as the piston rises," says the inventor. "On the down stroke, however, it is squeezed up a by-pass into the head of the cylinder. At the same time the exhaust port opens and permits the burned gases to escape under the seventeen-pound compression."

pression of the new gas coming in. Then on the upward movement of the piston the new gas in the head of the cylinder is compressed by thirty-two pound pressure and is ready for the spark. Gas is compressed twice before it is exploded. The engine is valveless, all the working parts moving on ball bearings, these being the cam, the roller bearing and the piston containing the wristpin.

"One cylinder of my invention is the equivalent of four of the ordinary motor engine and will drive a ten-ton truck," he said. "The engine will occupy one-fifth the space of the ordinary motor car engine. It will use about one-fifth the gas needed at present in a car and one-half pint of oil for five gallons of gas, the oil being mixed with the gasoline."

APHIS CAUSES FEAR

Because warm weather, which breeds parasites that exterminate the aphid, was so late in coming this year, this dreaded apple tree pest has made fast headway in New Jersey. Farmers in this state are taking all precautions against the spreading of this pest.

Canada's total wheat export for eleven months totalled 244,142,657 bushels. This wheat is valued at \$338,246,810.

Full Factory Equipment—4 Door Sedan (Not a Coach)

A mile-a-minute performer—the fastest Four in America!

One horse-power to every sixty-five pounds of chassis weight.

And this is only half the story! Here's a car that will look like new and travel like new long after most cars have passed into old age.

The answer is quality—Dodge Brothers quality! Quality materials and construction unequalled by many cars hundreds of dollars higher in price.

Built to give trouble-free, economical service over a long period of time.

Longest springbase of any car under \$1650.

Smart new bodies—beautiful lines. A brilliant performer at the lowest price for which a Sedan was ever sold by Dodge Brothers!

FORCES TO BE REDUCED

Paris, Aug. 23.—Readaptation to circumstances of the Allied troops of occupation in the Rhineland is on the verge of conclusion, it was semi-officially learned at the Foreign Office here to-day. Conversations between Great Britain and France have been going on for several weeks concerning a decrease in the force of occupation and it is expected the French troops on the Rhine will be reduced to 50,000 within a fortnight.

Range Shows Development In Motor Industry

The wide range of car exhibits on display at the Provincial Fair gives the automobile enthusiast an excellent idea of the tremendous development that has taken place in the motor industry within the last few years. Of course, the models on show in the automobile building this week are the very latest of the manufacturers'

but this only serves to enhance the visualization of what has been accomplished in motor design and transportation. If you are in any way interested in automobiles or motor development, do not fail to see the magnificent exhibit between now and Saturday at the Willows.

EXPERTS TELL OF LIGHT TESTS MADE

Depressing Beam When Roads Are Wet Increases Glare, It is Claimed

Results obtained from laboratory and road tests of headlighting on dry and wet road surfaces with various types of head-lamp beams, as reported at the Summer meeting of the Society of Automotive Engineers by R. E. Carlson and W. S. Haraway, of the Edison Lamp works of the General Electric company, show that depressing the beam of a depressible-beam head-lamp, when an asphalt or concrete surface is wet, greatly increases the apparent intensity of the beam above the road, evidently due to the

reflection from the road surface, and that this intensity extends far above the horizontal height of the head-lamp, thereby defeating the object of depressing the beam. With a non-symmetrical beam, produced by a two-filament lamp, disposed so that the beam is directed straight ahead from one filament, but can be shifted to the right by switching to the other filament, very little light is projected into the region in which the eyes of an approaching driver would be located. This effect can be produced by using an auxiliary driving light aimed to the right of the axis of the car.

When two facing cars both used the upper beam of a depressible-beam head-lamp on a wet asphalt road, a target three feet from one car and three feet above the road was visible at a maximum distance of sixty-seven feet. With both cars using the non-symmetrical beam aimed to the right, the target was visible at 150 feet, and when placed near the right hand curb was visible 315 feet. Conclusions deduced from the tests are that wet road surfaces change

the light distribution materially, resulting in greater glare; more light intensity is required to reveal an object on a wet road, due to interference with vision and change in distribution; increasing the light intensity in a symmetrical system does not improve visibility; a non-symmetrical system in which the high intensity portion of the beam is directed to the right of the car axis reduces glare and allows better vision; use of two 21-candle power lamps does not give sufficient light flux for all requirements; use of a widespread low intensity beam near the car, in combination with a relatively narrow controllable high-intensity driving beam has advantages for both dry and wet roads; no reason is known why a fixed-focus design should not be used with a somewhat longer focal-length than at present, with suitable reflectors or lenses for the low intensity beam, and the use of auxiliary driving lights with the beam directed to the right should be encouraged.

TWO DROWNED IN LAKE

Belleville, Ont., Aug. 22.—Word of a double drowning fatality which occurred on Sunday in Paudash Lake, near the village of Bancroft, in the northern part of Hastings County, has been received here. A young couple, Margaret Siddon, seventeen, and Allan Reel, twenty, both of Wood, in North Hastings County, were the victims of the tragedy. They were in a motorboat which caught fire and before aid reached them, they jumped into the water and went under.

RADIO REPORTS FIRES

Planes of the Royal Canadian Air Force are equipped with small transmitting sets with which pilots report forest fires to headquarters. On receipt of a report reserve planes with fire fighters are sent out without delay.

USED CARS ARE A SOUND INVESTMENT

Buyer Gets His Money's Worth in Purchasing From an Authorized Dealer

"I expect to be in town early in September, and shall be getting another second-hand Ford then or soon after. So if you have any which you can recommend, as good value for about \$50, like the last one I got, please advise me." This is a message received by the National Motor Company from an out-of-town customer, which speaks of the satisfaction he derived from the last car that he purchased. Many such stories could be written with regard to the service that is being derived from the used car as they are being sold today. The public who purchase the used car from the authorized dealers receive full value for the unused mileage that is in the car. Many features and angles enter into

the purchase by the dealer, the selling and servicing of the used car. Especially does it apply to a used Ford car as the buying public are very familiar with the new car value, which is well advertised, and is set by the Ford Motor Company of Canada Limited. So is the used car value known to the public, not only its resale price, but the condition of the car owing to the great number of persons who are more or less familiar with driving to-day, who have probably owned a car before, and can judge to a certain extent the exact mechanical condition of the car that they are going to buy. The haphazard methods of purchasing a used car from a man who is buying a new car and selling it as he have passed.

To-day the merchandising of the Ford used car is a complete study in itself. No car is worth more than what the public will pay for it. Therefore, that is the basis on which all transactions must originate. No dealer can hope to survive and do a thriving business and turn out an inferior article. Therefore, it is most important that the inbuilt quality into the car be of the highest standard. Each used car as soon as it is turned in is appraised and the car put in the shop where the work is done by expert

mechanics, all worn or broken parts are replaced with new genuine Ford parts, and the electrical system is then checked over, the battery is rebuilt and guaranteed, after which the car is put in the paint shop, where it is lacquered. By using the lacquer finish the dealer gives the customer an up-to-date car with a finish that is enduring and gives a much better appearance than the old-time paint jobs. Because of the low cost of genuine Ford parts, it is possible for the dealer to turn out a reconditioned car on which he can give a sounder guarantee than any other make.

There are over 33,000 service stations to take care of your requirements, and with the knowledge that the factories are guaranteeing production of the present model T parts for the next ten years, the purchaser of a guaranteed Ford car from an authorized Ford dealer is assured of getting the greatest transportation value available, and at the lowest initial cost with a cost of upkeep the lowest available to-day. To further carry out the service policy on the guaranteed, reconditioned Ford car the National Motor Company, local authorized Ford dealers, are having incorporated into their new building on Yates Street a covered in used car

show room, but which will be wide open to the public for their inspection at all times. By keeping these cars under cover, the natural deterioration of allowing cars to stand out in the weather will be completely eliminated, and prospective buyers will be able to view the show room at all times to pick their choice of the car model that they desire. Complete service, terms and arrangements will be available to the purchaser on this floor.

TRY AUTO CLAIMS IN SMALL DEBTS COURT

Automobile Clubs of B.C. Will Attempt to Extend Jurisdiction of This Court

Extension of the jurisdiction of Small Debts Court to enable it to try cases arising out of automobile collisions where the amount claimed is less than \$100.00, will be sought by the

Automobile Club of British Columbia at the next session of the Legislature. It was announced following passage of a resolution presented at the recent meeting of the board of directors of the motorists' organization by Geo. E. Housner, president.

A great majority of these claims, other than those for personal injury, are for amounts less than \$100. Mr. Housner explained to the meeting. If unsettled, he pointed out, they can at present be tried only in the County Court, and the expense of enforcing such a claim is entirely out of proportion to the amount involved. The enforcement of a just claim is therefore often effectually prevented, the club president asserted.

Amendment of the act creating the Small Debts Court to handle cases for which there was at present no suitable legal machinery without the necessity of setting up any special tribunal, would prove a great boon to motorists, Mr. Housner added. The legal and legislative committees of the club was instructed to take the matter up at once with the Attorney General.

Human beings and nearly all animals have two eyelids. Birds and some reptiles, however, have three.

Public Acceptance Proclaims It:

Greatest All-Time ESSEX Achievement

Greater Power and Performance—Roomier, Finer Bodies

Popular enthusiasm has risen to new heights in proclaiming the surpassing brilliancy of this Greater Essex Super-Six. Spurred by knowledge that the most eagerly demanded Essex in history was retired to make way for it, public interest has crowded show rooms, not only here but throughout the country, to inspect, ride, and place a prior order for this phenomenal car.

That interest is intensified by the conviction that the preceding Essex was the greatest car of its size ever produced.

So, expect a great car when you come to see and try the new Essex Super-Six. Expect a more beautiful, luxurious and comfortable car. Expect a car measured in terms of the best you know, unqualified by size or price. Of course, you will look for speed, sparkling performance, unexcelled reliability and riding ease; for these already belong to Essex reputation. Yet, we freely say, that here, too, you must expect extra

margins of ability, brilliancy and quality.

No previous car—no previous value—gives anything by which to judge it. It is the greatest achievement in Essex history. See it and ride in it with greater expectation of fine things than you ever held for any but the costliest cars. You will not be disappointed.

And, although Essex production is the largest in our history, in view of the long condition of shortage, you should place your order at once if you would insure early delivery.

Siberians Catch Many Fish Now

Seattle, Aug. 23.—Although Alaska has had an unusually light run of salmon this year, Siberia is experiencing the greatest run in history and the Kamchatka River is filled with fish. Officials of the steamship Santa Ana said on their arrival here from northern waters yesterday.

The Santa Ana brought approximately 400,000 worth of milt cured King salmon in tins.

One trap at Ust, Siberia, yielded an average of 75,000 red salmon a day, and the fish were canned. In addition, three canneries at Ust packed 250,000 cases of reds in half pound tins.

Heavy Weather Defeats First Mail Attempt

Naval Air Station, Squantum, Mass., Aug. 23.—Heavy fog off the Massachusetts coast early Sunday defeated the first attempted shore-to-ship air mail flight and forced the PN-10, United States navy flying boat, to return to its base here after the big plane had battled the thick weather for an hour-and-a-half in an effort to reach the line Leviathan, 375 miles off the coast.

BOYS' NAVAL BRIGADE BAND

Upwards of thirty members of the Boys' Naval Brigade Band, which made a tour of Great Britain under the auspices of the Victoria branch of the Navy League of Canada, will arrive back in Victoria on the afternoon boat on Thursday from the mainland. The band, which won considerable praise for its smart turn-out at many centres in England, will be given a rousing welcome. The boys will be met at the boat by the Junior Pipe Band, and piped to the City Hall, where they will be given a hearty welcome by Mayor J. C. Pendray and members of the City Council.

FOG IN STRAITS HOLDS SHIPPING; LOCH KATRINE IN

Four Vessels Anchor at the Swiftsure Lightship Until Visibility Improves; Yokohama Maru, Due at Noon, Still Outside Straits at That Time; Loch Katrine Six Hours Late; Wanderer and Columbia Maru Held

Dense fog at the entrance to the straits has seriously hampered both inbound and outbound shipping during the last twenty-four hours. At least four inbound ships, two of which are destined for this port, remained anchored at Swiftsure Lightship last night and this morning waiting for better visibility before attempting the final lap of their voyages.

The Royal Mail Steam Packet Company's vessel Loch Katrine was due here at 8 o'clock this morning from the United Kingdom but did not get into quarantine until after 11 o'clock today and arrived at Hithet Docks shortly after noon. She had a few cargo shipments for discharge here and will also load 100 tons of outward cargo before proceeding to Vancouver. On the mainland, she will discharge 1,000 tons of general European cargo and will load 1,500 tons of outward freight.

The Nippon Yusen Kaisha liner Yokohama Maru, due here at noon today, was still anchored at Swiftsure at that time, according to advices received by H. Webb, local agent. This vessel is expected to dock late this afternoon or this evening. She has 138 tons of cargo for discharge here and twenty-two passengers for this port.

The Harrison liner Wanderer and the Columbia Maru, of the Mitsubishi Company, were both delayed, the Columbia Maru anchoring overnight before proceeding to Seattle. The Wanderer, bound for Vancouver, continued her voyage late this morning.

Five Vessels of Garland Line Sold

Seattle, Aug. 23.—With receipt of advices here yesterday that the five Garland Line steamers had been sold to Moore & McCormick of New York, it is reported that the new owners will put the carriers into regular lumber service from Grays Harbor to the east coast.

The five ships are the William Campton, James B. Duke, George Allen, Edgar Bowling and William Perkins.

Wheat for export to the Orient and Europe is arriving in Seattle from Eastern Washington at the rate of between forty-five and fifty carloads a day.

The time used is Pacific standard time for the 120th Meridian west. It is counted from 12 o'clock, midnight to midnight. The figures for high water to distinguish high water from low water. Where black occur in the table, the tide rises or falls without turning.

The height in feet and tenths of a foot, measured from the average level of lower low water.

Equivalent—To find the depth of water on the all of the drydock at any tide, add 13.5 feet to the height of high water at above given.

PASSENGERS OF PRINCE RUPERT IN VANCOUVER

Princess Beatrice and Cardena Bring List; Praise Captain's Skill

Rudder of Vessel Was Ripped Off on Ripple Rock; Now Limping Into Port

Vancouver, Aug. 23.—Seamanship displayed by Capt. D. Donald, master of Canadian National S.S. Limited, liner Prince Rupert, when his ship lost its rudder in Seymour Narrows Monday morning, is praised by passengers of the vessel who reached Vancouver last night.

Caught without steering way in the centre of the Narrows, with powerful currents and swirling whirlpools tugging the ship toward the rocks, Capt. Donald held control by skillful use of his twin propellers.

He kept the big ship, with its hundreds of passengers, safely in the roaring channel until the steamship Cardena, which was nearby, placed a line aboard and towed the rudderless vessel to safety.

FOGGY WEATHER

Capt. Donald is commended especially because he performed the feat in foggy weather.

Seymour Narrows is about five miles long, and the tides roar through it with tremendous force. Directly in the middle of the channel is Ripple Rock, a treacherous and dangerous pinnacle reef.

Donald took his ship into the Narrows shortly before the low water slack, and fog descended shortly afterwards. Some distance behind her, St. Cardena, Capt. A. Johnston, was also proceeding south. The stern of St. Rupert touched Ripple Rock, and the rudder was rendered useless.

Capt. Donald controlled his ship with her twin propellers, and held her safe until Capt. Johnston of the Cardena was able to render assistance. The latter vessel was then taken to Flumper Pass, north of the Narrows. Her passengers were transferred to St. Cardena. The Cardena sailed for Vancouver at 8 p.m. Monday and the Beatrice came in at 8 p.m. St. Prince Rupert, with the tug Dauntless acting as rudder, is due this afternoon. She passed Seymour Narrows at 9:15 p.m. Monday, and is steaming as fast as the Dauntless will let her.

USING OWN POWER

The Rupert is using her own power and is reported undamaged except for the loss of her rudder. It is expected that repairs will require a week or ten days. The ship will go in Burrard drydock, North Vancouver.

The regular Monday sailing of the Canadian National S.S. Limited to Skagway and way points has been cancelled. The next northern sailing will be the St. Prince George, Wednesday evening.

SAN FRANCISCO SHIPPING

San Francisco, Aug. 23.—With Capt. George V. Richardson on the bridge, the Panama Pacific liner Manchuria arrived here early yesterday from New York with a large passenger list and a capacity cargo. Despite engine trouble after leaving Balboa, the vessel came into port precisely on schedule, keeping pace with her sister ship, Mongolia. Over a period of two years there has not been a difference of more than a few minutes between the two vessels on their voyages between New York and San Francisco. With the arrival of the Mongolia, it was learned that the liner Finland will be withdrawn from the New York-Pacific coast run for one trip, her scheduled sailing from the east coast on September 9 being cancelled.

C.P.R. PROMOTIONS

Winnipeg, Man., Aug. 23.—H. A. Plow, assistant general freight agent of the Canadian Pacific Railway at Vancouver, has been promoted to the post of general freight agent for Western lines, according to an announcement made yesterday by C. E. Jefferson, assistant freight traffic manager of the company's Western lines. Other promotions announced by Mr. Jefferson yesterday follow: A. T. McKean, division freight agent at Calgary, is appointed assistant general freight agent, Vancouver; R. W. Drew, division freight agent at Regina, is appointed division freight agent with offices at Calgary; K. Elliott, freight agent at Edmonton, is appointed division freight agent with offices at Regina; C. A. Staples, city freight agent, Calgary, is appointed district freight agent with offices at Edmonton; and A. Stewart, traveling freight agent at Calgary, is appointed city freight agent at Calgary.
